BULLS**

# Welcome!

Welcome to our annual sale. After moving from October to January we are trying to find that just right niche and I hope it is here. These bulls were warmed up slowly to yearling weights of about 1,000 pounds and then put on GroSafe testing at SAREC. Ultrasound is taken at the end of the test. We fed nothing but salt until late August. The bulls stayed out on grass in big pastures until after we weaned. I think they will look good when we tape them and great by sale day. What really needs to be showcased is the uniformity and improvement in these cattle. In the last four years we have had a 19% improvement in ADG with the same ration and the carcass scans have significantly improved. This is about the improvement of an entire calf crop, not an individual. When you milk you will get some cream and we have some exceptional bulls coming to the top. We have some top RFI scores and outstanding ultrasounds for you. Our reference sires are competitive nationally and I think these bulls could do it anywhere.

We have been diligent in selecting calving ease, focusing on cattle that are shaped right. As we move into our second heats birthweights do go up. We bred up over 95% last year. If you end up on a lease on the west side you get to walk at least 32 miles on your way home in three different trips. Wind and snow are death on bad bags and we have to cull hard on it. Our udders are competitive anywhere and I don't like to milk. Dispositions are crucial here and they are gentle. We will sell the bulls on video instead of passing through the ring for the first time.

This barn is 70 and as I put down the north section of bleachers there was an appropriate creak for its age. Hats off to the guys from JC Berry on up to persevere with a vision and resolve to let us be here today. My dad's vision, love for the people, and the cattle in this business gave us a foothold you can't buy. Mom fed lunch in three heats the summer this barn went up and she is an inspiration today. Both she and Janice's mom are both well and in their early nineties. Obviously I have great support beside and behind me and thanks to Janice, Eric and the family for all of it. Lander puts in many hours and Amy is a great resource. We intend to have these cattle look as good as we can and be honest about what they are.

Jody Davis drove 22 hours from Mississippi on October 19 (our old sale date) to buy a bull because his last Berry bull, 37Y, had exceeded his expectations and at age 10 was done. The bull had been traded from our first internet sale through Arkansas and had landed about 20 miles off the Gulf of Mexico. I would not let him have lot 36 and I had to explain it wasn't him but the people on sale day that he had to wait for. We know you have many choices and thanks in advance for coming here. It is worth the drive.

**WHERE  
COWMEN  
BUY  
BULLS**

**See you sale day!**  
**Jay and Janice Berry & Family**

**Please note any EPD in the top 10% is noted next to each of those bulls' EPD traits**

These cattle have adapted and have been PAP-tested well in Burns, Big Piney and Walden. If you make it there you can go anywhere. Our current sires have all been tested. All bulls have passed a breeding exam and our herd health is good. We stand behind these bulls to be sound breeders. Health papers will be provided to go anywhere.  
Free delivery for \$4,000 purchase up to 300 miles and we cooperate on any delivery anywhere. \$50 off on bulls picked up in a week.  
Internet bidding is carried by The Livestock Link.

#### Explanation of feed testing measurements

*Bulls were housed at the University of Wyoming SAREC GrowSafe testing facility from March 5 through June 21, 2021. Bulls were trained to feeders and evaluated on an 80-day feeding study where individual feed intakes were measured. A backgrounding/growing diet was fed, consisting of cracked corn, ground alfalfa hay, corn silage and protein supplement. The ration was formulated for an estimated daily gain of 3.25 lb./day. Individual weight gain and feed intakes were collected on each bull.*

Calculations included:

**Overall Weight Gain** – Two initial and final weights were taken on consecutive days, with the 2 day average used to calculate total gain during the 79-day feeding study.

**Average Daily Gain (ADG)** – Total weight gain divided by 79 days.

**DM Intake** – Actual feed intake measured for each individual bull, through the GrowSafe feeding nodes. Feed amounts provided in the table are adjusted to a 100% Dry Matter (DM) basis.

**Feed:Gain** – A measurement of feed efficiency, listed as the lb. of feed required to achieve 1 lb. of weight gain for each bull. This is calculated using the daily feed intake and ADG for each bull. A lower number indicates a more efficient bull (less feed required to achieve weight gain).

**Gain:Feed** – Also a measurement of feed efficiency, listed as the amount of weight gain achieved for each 100 lb. of feed consumed. In this case, a higher number indicates a more efficient animal. In other words, more weight gain was achieved per 100 lb. of feed consumed.

**RFI – Residual Feed Intake.** RFI is the preferred method of evaluating efficiency in seedstock animals because it is an efficiency measurement that adjusts for the size of the animal. Using traditional feed efficiency measurements (to select cattle) would cause you to indirectly select for larger animal size because larger frame animals tend to be more efficient. RFI is preferred because it is a feed efficiency index independent of animal size. RFI numbers refer to the comparison between actual feed intake vs. expected feed intake (based on the ration fed and animal size). A negative number is preferable, indicating a more efficient animal that consumed less feed than predicted. Positive RFI indicate a less efficient animal that consumed more feed than expected.

**Rankings and combined Ranking.** All bulls were ranked based on ADG, feed efficiency and RFI, with individual rankings provided. A combined ranking was also included, which equally weights the bulls ADG, efficiency and RFI ranking, with bulls ranked on their combined scores. The #1 combined ranking would indicate a bull that had the highest combined ranking in all three measurements.

- My new employee, Eric, asked me what made him famous. I said, "It's a thing called calving ease direct." Bred to any color heifer, he will define it.
- He is the Hereford bull to use for maternal heterosis because his daughters are moderate in size, easy fleshing and very maternal. Long Haul is a potent, cow herd-builder. His birth to yearling spread is dramatic and we have again been able to stack low birth weight and have performance. At four years of age, he left here this fall having produced three outstanding calf crops and sold a large volume of semen. He looked and moved great. Calving ease with carcass isn't easy to find and it is very rewarding to have partnered on a great sire like this. We have two more years of these calves coming and hope they light up your program like he did ours. Eventually we will have to sell some daughters so let us know if you'd like to own one. 24% of the Long Haul progeny going through the AHA website have been born here. Lot 19 topped our feed efficiency trial and lot 18 had the biggest ribeye. No boxes to check, that's a proven herd bull.

- I had been searching for a good way to introduce 215Z's influence into this herd. A son of the dominant sire, 619D, this bull gave us a crackin' good set of EPDs which stand by themselves. Weaning, yearling, carcass and ribeye are top 1%. His progeny both here and at Stangle's are weighing up great and look for the numbers to stay solid. This sire group has so much power and are really rugged, range bulls. The heifers are as pretty as the bulls are, stout and he will be used heavily here. Sixteen sons sell.

- Vince Holton asked me how he got this bull bought two years ago. Unsure what the answer really was, we got 28 calves to prove he had done the right thing and couldn't be happier. His ribeye scan adjusted down to 16.55, which is bloody huge. The bulls have great shape and strong tops and are very good on their feet and legs. Both sexes have extra pigment and we may have to go back and use this bull more. His dam, Cinnabear, was the beef and disposition queen for the 13 years we had her. These sons are next-level performance cattle and deserve serious consideration.

- His sire, Small Town Kid, is pictured, tells you why he is an easy choice on heifers. He sires below breed average for birth and is highly proven with over 1,100 progeny. This is a heifer-safe pedigree. Grandam, 809, was flushed for export in her day and there is a lot of quality here to go with calving ease. The daughters have made really nice cows here and his heifers will be no exception.

- This bull was an easy choice as a service sire on our heifers. The cow family has consistently given us extra muscle without too much frame. He stands out square on all four corners. He is stout for a bull with a 65 lb. birth weight. Buford, you might remember was an extremely small town between Cheyenne and Laramie. We look forward to his calves.

• A polled bull with two red eyes, smooth-made for calving ease and posted an impressive winning ratio from a heavy milking, two-year-old dam. There are three generations of consistently outstanding matrons in this pedigree he has one of the best rib eye measurements. Carcass plus maternal equals a bull to retain females from. He is a sleeper and in the pen with the big dogs. Don't miss him.

• Another great Long Haul son with top numbers from a first-calf heifer, whose mother was a Dam of Distinction. He has some extra frame, hold his head a little higher and acts like he could really cover some country. If you want to put the Long Haul advantage to work, here is a great opportunity.

- He is massive, big-middled with good eye pigment and a nice spot on his face. All ratios, both performance and carcass, are better than average with the big-time EPD profile. He is out of a first-calf 314 daughter with a nice, silky udder and is moderate in her frame. He is one of four Nightcap sons in our sale. He has every chance to be better than his sire. Brothers sell as lots 39, 42 and 81.

- He has a great phenotype and is outstanding and correct in his structure. A stylish bull, he has a good spring of rib and is wide down the top. There are two really big cows behind his PI dam and I expect him to grow. He finished right in the middle, SAREC and posted a double 107 at weaning and yearling. That is serious performance. He is a herd bull prospect. Great big \$CHB index is a good indication of the balance in his performance.

- He is as smooth as they come for a performance bull. He is long, strong-topped and made in one piece. There are two Outcross sons this year and he is an easy choice as a herd bull prospect. He crushes both performance and carcass ratios. This bull has two red eyes and his dam has already developed into one of our premier cows. Every time an Outcross heifer leaves the chute we say, "I've got to use that bull more."

• When this bull got back from SAREC my jaw just dropped. He was wide-topped, deep-flanked and looked every bit of the herd bull he is. He was our second choice for heifers because of his pedigree but I really wish we had some calves coming. His mother is very moderate framed with the big spring of rib and has an impressive udder. He is smooth polled, has full pigment with full herd bull credentials.

• It is very exciting when you come upon an individual who is grown into his numbers with a great look like this herd bull prospect has. Full pigment, extra rib, moderate frame dam are the start of a long list of impressive credentials, led by his feed efficiency data. RFI negative 2.93 is huge when translated to what it could mean for an entire herd. Here is another great calf out of a first-calf heifer. He is very special so study him hard to see if he's the bull that can improve your herd.

- He is a super attractive 36E son with a 72 lb. birth weight. The bull has full pigment and his mom milks like the milk cow. At branding we wondered how does anything that thick keep growing? He does. Visually, he has the most expression of muscling of any bull in the sale. His carcass numbers are almost off the charts with a 115-rib eye and a 105 IMF he is stocky and very moderate in his frame.

• This calf's mother has proven she is a real milk machine. Grandam, 801, was as pretty a cow as we have ever raised. His personal performance is the perfect mirror of the explosive EPD profile these Dominator sons have. He is very long-bodied and correctly balanced in his make-up with a great coat of hair. If you'd like to improve your marbling scores, he is outstanding. This cow's two sons averaged a 117 index for IMF.

• This bull is more moderate in his make-up yet in some ways the most impressive of the 829. If you want a bull that can hold the performance averages, lead the RFI score (-2.67) and have above-average carcass numbers you've got the real deal. You double up your power with 628 on the bottom side and dam 115 had a maintenance free nice and tight under all her life.

• He is a big soggy prospect with a great head, tremendous individual statistics and a rib eye score that make this bull easy to mark. Expect to wean a heavy calf crop out of this one Any place you find the 271 cow in a pedigree here, expect it to transmit to exceptional thickness. 1F delivered what his pedigree said it would.

- He is one of the most aggressive in his frame and performance of the Long Haul sons and I think he's great. His dam has more mass and bone under her than almost any cow in the herd. She is Cinnebear's only sister and will calve here next year at 12. This bull's full sister just had her first calf and is a role model mirror to this bull, slightly smaller in frame, very feminine and gave a lot of milk. If you want to find out what Long Haul can do and do better than a lot of other cattle you should find this bull.

- This is a good Outcross pedigree for many of our repeat customers. His two-year-old dam is a full sister to Lot 51. Moderate at birth, these Nightcap sons have the numbers and performance to get after a good payweight. I would recommend him highly for replacement females.

- He is explosive in his performance. He is rugged, wide topped, deep flank and what a range bull should look like. He has three great cows behind him and as impressive as I expect his bull calves to be I also think the heifer calves have a chance to be their equal. Expect this bull to be near the top of the order sale day. No surprise he finished 10th in ADG with all this other good stuff going on. Sorry no picture but it is an instant replay of this is the real deal.

- I thought there was every chance that this was the bull to lead the pack all the way to the end. Weaning and yearling indexes are top of the class. I don't think he liked it at SAREC. I don't know why but his performance ended when he got there. His RFI is a stand out but I think he was just mad while he was there. 452 is extremely beefy and big bodied with a neat udder. His half-brother, 19J, may top this sale next year. He can get his head up but it's worth the risk.

- The pedigree says female progeny will be exceptional and 140 is textbook in every way. There is great pigment, eye set, plenty of stretch, lots of frame and a bull with a long stride. Horn breeders hook up on the Long Haul advantage and keep every heifer out of this one. His SAREC performance speaks volume about what he can do for your bottom line, finishing number five composite.

- Just like his mother this bull stands on a tremendous bone and is very rugged. With a name like Katniss she has to be a straight shooter. She is nine this year and he is easily the best calf she has ever had. He's very well proportioned and balanced for such a meaty individual. Like all of his brothers, he is everything I could hope to offer you in a range bull. Dam is our widest Sensation daughter out of Sandy (2000), mother of herd bulls.

- Mr Thick is a deep-bodied prospect out of a high-efficiency cow family that breeds lots of pigment. The Outcross mating on Sensation females is spot on. If your cows have gotten big on you, you have to look at his feed efficiency and gain data. He is number two on gain, six on RFI with a composite score of three at SAREC. He has two generations of low birth weight cow families behind him.

- His dam produced 9 calves with WI an YI indexes greater than 104. She had great pigment with one of the awesome haircoats we have ever had. He scorched his WI with 109 and stepped up to index 111 at yearling. He spent all summer walking the fence looking for something and I think he will be filled up and look like the herd bull prospect he is by sale day. He is very long, smooth-made and exceptionally correct for a big bull.

- He has an Outcross pedigree from one of our oldest and heavy milking Kingpin daughters. You have to appreciate the bulge and thickness in this bull's rear quarter and the way he carries that width all the way down the top. He has two nice red eyes it has lots of potential. He scanned an actual REA at 15.03 and adjusted to a 13.87, indexing 114. He is rock solid to increase red meat.

- His sire was a very outstanding Denver supreme champion and the udder credentials on him are the very best. He has big-time weaning to yearling figures, which let you know his calves are going to cash flow for you. This bull has an Outcross pedigree for most buyers and his RFI score of negative 4.55 is astonishing. Great efficiency is sometimes hard to visualize but this might be a good picture of him. Dam 8 calves WI 103 YI 100.7 scan data four head fat depth 116.8 REA 104.5 IMF 102.5.

- There is no EPD for smooth-made or great shape, but this bull has lots of both. This horned Long Haul son could best be utilized on heifers and with the 75 lb. birth weight calving out a set of black baldies couldn't be easier.

• This bull has two red eyes, is smooth-shouldered and easy on the eyes. When you see the cow power behind him and the grow-power of 531, mark him. His dam has been outstanding in many ways and her Sensation daughter is tops. Every time we breed this cow, I pray heifer. Good \$CHB numbers predict a good future for this bull.

- This bull finished number two composite at SAREC. He represents how our program stacks up against these other sires and he makes us proud.
- He is near the very top for extra pigment and he has that great 1F extra meat look. I'll back that up with an REA index of 105 and IMF of 110. He is a top prospect out of the 209 family that Graves have had such good luck with. He is correct in his make-up and travels freely.  
This is real carcass data, not an EPD, and I would trust it.

"That brand looks easy enough to read!"

- This is a bull you will have to look to the future with. We lost his dam after weaning and it put him in a hole he could not climb out of. He has a very strong top and stands on heavy, flat bone and moves out well. He has a grow bump that tells me he will get a lot bigger. Grandam, 187, was a great, big, Excel-bred cow that gave a ton of milk and could breed performance. We have retained a Long Haul daughter out of her.

- Best of cow families behind him and a good marbling score make this Nightcap worth a look.
- He is a very long-spined bull with a tight sheath that looks like he will really be able to travel. The maternal genetics are outstanding from a first-calf heifer that looks to be one of the best. He could probably work on heifers with a 77 lb. birth weight. Good IMF score and balanced EPD profile from these new genetics.

- Big, red eyes and curly, yellow hair make this Amigo easy to find. There is way more growth than the paper shows with big individuals behind him. You can be sure to cover the country and have them weigh up good. IMF 109 ratio.

- It will be fun to raise and easy to sell big, goggle-eyed cattle with this much shape. He was 102 at weaning and had a rib eye index of 105. He travels freely, has a strong topline and is a great example of what the 1F bull is going to do for us. He comes from a very strong cow family and has a predictable outcome.

- This is the opportunity to find a great, horned prospect with the Long Haul advantage. A young bull, he finished number one on feed to gain and number 2 in RFI (-4.89). There should be a long pause here because this is the greatest shot you'll have at taking advantage of our feed efficiency data. He is not average but exceptional. Same cow family as lot 60.
