WHERE
COWMEN
BUY
BULLS

Welcome!

Welcome to our annual sale. Every year we consider it a privilege to invite you to evaluate these cattle. They are survivors. We are survivors of a pressure cooker year that only the zenith in this cattle market could outshine the epic reversal of natural fortune in all that rain. These cattle look great and are as powerful and even as they come. The raw performance and quality of the offering speak volumes about our genetic choices for you and what you can add to each calf. Balance is critical in all traits and sustainability is crucial proven by the way these cattle adapted and responded to staggering dry and cold conditions.

December fits better than January and we are trying to find that just right niche and I hope it is here. These bulls were warmed up slower to yearling weights this year and then put on GroSafe testing at SAREC. Ultrasound is taken at the end of the test. We fed nothing but salt for the first month they were home. The bulls stayed out on grass in big pastures and came in mid-October. I think they will look good when we tape them and great by sale day. What really needs to be showcased is the uniformity and improvement in these cattle. We are selling more, better cattle with a lighter ration and the carcass scans are significantly improved. This is about the improvement of an entire calf crop, not an individual. When you milk you will get some cream and we have some exceptional bulls coming to the top. We have some top RFI scores and outstanding ultrasounds for you. Our reference sires are competitive nationally and I think these bulls could do it anywhere.

We have been diligent in selecting calving ease focusing on cattle that are shaped right. As we move into our second heats birth weights do go up. We bred up over 90% this year at home. If you end up on a lease on the west side you get to walk at least 32 miles on your way home in three different trips. Mother nature and good fortune had us summer 113 pairs in beautiful Walden Colorado. Choices had to be made early and we did not have the potential for grass necessary for the summer. It is great to know you cowherd can perform where you hope to send bulls. We are very grateful for the use of the lease and care they had there. Wind and snow are death on bad bags we have to cull hard on it. Our udders are competitive anywhere and I don't like to milk. Dispositions are crucial here and they are gentle. We may sell the bulls on video instead passing through the ring.

Hats off to the guys from JC Berry on up to persevere with a vision and resolve to let us be here today. My dad's love for the people and the cattle in this business gave us a foothold you can't buy. Mom has always been an inspiration for all of us. Watching her pass this June was clearly a tough loss and a blessing for her at age 95. The sale stories and what she did to get us here and her love for all of us left us without words. Role model. Obviously, I have great support beside and behind me and thanks to Janice and the family for all of it. Everybody got us here and we welcome Hannah as Ben's new bride and a great joy to our family. We intend to have these cattle look as good as we can and be honest about what they are.

We know you have many choices and thanks in advance for coming here. It is worth the drive.

See you sale day!

Jay and Janice Berry & Family

WHERE
COWMEN
BUY
BULLS

Please note any EPD in the top 10% is noted next to each of those bulls' EPD traits

These cattle have adapted and have been PAP-tested well in Burns, Big Piney and Walden. If you make it there you can go anywhere. Our current sires have all been tested. All bulls have passed a breeding exam and our herd health is good. We stand behind these bulls to be sound breeders. Health papers will be provided to go anywhere.

Free delivery for \$4,000 purchase up to 300 miles and we cooperate on any delivery anywhere.

\$50 off on bulls picked up in a week. Internet bidding is carried by The Livestock Link.

***WE WILL RETAIN PARTIAL OWNERSHIP IN SELECT BULLS
TO BE ANNOUNCED SALE DAY**

Explanation of feed testing measurements

Bulls were housed at the University of Wyoming SAREC GrowSafe testing facility from April 15 through June 1, 2022. Bulls were trained to feeders and evaluated on an 80-day feeding study where individual feed intakes were measured. A backgrounding/growing diet was fed, consisting of cracked corn, ground alfalfa hay, corn silage and protein supplement. The ration was formulated for an estimated daily gain of 3.67 lb./day. Individual weight gain and feed intakes were collected on each bull.

Calculations included:

Overall Weight Gain – Two initial and final weights were taken on consecutive days, with the 2 day average used to calculate total gain during the 79-day feeding study.

Average Daily Gain (ADG) – Total weight gain divided by 79 days.

DM Intake – Actual feed intake measured for each individual bull, through the GrowSafe feeding nodes. Feed amounts provided in the table are adjusted to a 100% Dry Matter (DM) basis.

Feed: Gain – A measurement of feed efficiency, listed as the lb. of feed required to achieve 1 lb. of weight gain for each bull. This is calculated using the daily feed intake and ADG for each bull. A lower number indicates a more efficient bull (less feed required to achieve weight gain).

Gain: Feed – Also a measurement of feed efficiency, listed as the amount of weight gain achieved for each 100 lb. of feed consumed. In this case, a higher number indicates a more efficient animal. In other words, more weight gain was achieved per 100 lb. of feed consumed.

RFI – Residual Feed Intake. RFI is the preferred method of evaluating efficiency in seedstock animals because it is an efficiency measurement that adjusts for the size of the animal. Using traditional feed efficiency measurements (to select cattle) would cause you to indirectly select for larger animal size because larger frame animals tend to be more efficient. RFI is preferred because it is a feed efficiency index independent of animal size. RFI numbers refer to the comparison between actual feed intake vs. expected feed intake (based on the ration fed and animal size). A negative number is preferable, indicating a more efficient animal that consumed less feed than predicted. Positive RFI indicate a less efficient animal that consumed more feed than expected.

Rankings and combined Ranking. All bulls were ranked based on ADG, feed efficiency and RFI, with individual rankings provided. A combined ranking was also included, which equally weights the bulls ADG, efficiency and RFI ranking, with bulls ranked on their combined scores. The #1 combined ranking would indicate a bull that had the highest combined ranking in all three measurements.

• We are introducing a rugged new polled pasture bull that was as wide down the top as any bull you buy. He is an incredibly consistent breeder with a look alike calf each time and he works on LongHaul daughters. His maternal credentials with 8Y and his dam and full sister are impeccable. They are big boned and bodied but not large at birth. 10 bull calves averaged 105W and 103Y so in this crowd he stands up. He breeds exceptional pigment and can add a lot there. His mother and full sister are just great cows WW top 16% YW top 3% and nine sons sell.

• He is an extraordinary blend of calving ease, mama cow builder, and herd bull maker. He was proven here and has outstanding progeny everywhere. He is the Hereford bull to use for maternal heterosis because his daughters are moderate in size, easy fleshing and very maternal. His birth to yearling spread is dramatic and we have stacked low birth weight and performance. Calving ease with carcass isn't easy to find in a bull. We have a few bred heifers and heifer calves for sale this fall. It is very rewarding to have partnered on a great sire like this. Thanks to Dale Venhuizen and Lerwicks for the opportunity and good luck to Rocking Chair ranch as he finishes his career in Texas. Outstanding sire group with seven sons. They WI 102 and YI 105 and pounds pay. HE is in the top one % for six traits, six more traits in the top 10%, closing out an incredible proven EPD profile.

• We jumped on the chance to own a deep bodied sire like this. 2022Z was the lead off cow in Holden's 2019 Female sale. She is big bodied, deep sided, great uddered, and super stylish. 2022Z has exceptional EPDs and production record combined with a fantastic phenotype, udder quality, big time carcass strength and she is backed by the great HH Miss Advance 5139R donor cow. The females are the gem of this deal. His individual carcass indexes were REA115 and marbling 137. Second year in a row number one RFI lot 114 topping SAREC for feed efficiency. In 2022 he was proven in Coopers donor pen with eleven sons averaging \$22,600. He is now owned by good friend Stan Cline and we enjoyed the partnership with Baumgarten Herefords. Our top carcass group REA 103 MARB 107 and eight sons sell. He is Top 2% M 3% M&G 3% Teat 3% REA 19% MARB in the BREED.

• He is a very moderately framed with a big set of pants and abundance of natural fleshing ability. He is solid marked, great head, and breed character. He looks as good after he has bred his cows as he went in. He moves very freely, is correct, and has exceptional width down the top. His calves came back from Walden with so much hair you did not need a sire code. His dam is landmark as well as his brother Forty Creek in Canada for performance but the numbers do not let you see all that is here for you. This sire group has the most proven set of dams and are very good. Eight great sons sell.

• He lands in the top 10% for teat and udder and after the first heifers it is real. Big bonus is top 10% REA and fat which we would agree are impressive stats. As a sire group the yearling heifers had our best PAP scores in Walden last summer. He is a son of Bella 219 that made the K&B program so top notch. He was out of 628 which just hit high marks for REA here. They are stylish, thick, but moderate cattle. Our entry for the pic of the bred heifers at Ladies of the Royal was a daughter to Carlson Cattle and Riggan Goings from Indiana. 8 sons sell.

• Buy a pen full of them when you can get a pattern like this for a calf crop.

KA-CHING.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year.

That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size.

Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability.

That's real money and real results.

COME HOME TO HEREFORD.
