Welcome from **BIG GULLY** farm

10 AND 56 - the number of years hosting a live bull sale AND breeding Hereford seedstock, respectively. Transitioning from selling private treaty to publicly a decade ago was an anxious, stressful, exciting, methodical, humbling and necessary experience- every year those feelings endure. Suffice it to say, we appreciate every person, family and operation that has supported us before and since- validating that decision 10 years ago.

Breeding the whiteface bulls to build profitable, productive, durable and maternal baldy cattle for commercial producers is our PRIMARY desire. Invigorating the utilization of Hereford cattle for their time-tested: docility, adaptability, feed efficiency, resilience, structure, fertility, longevity and crossbreeding versatility remains top of mind. Advancing past that is where the REAL EFFORT needed to and has taken place. Instilling udder quality, milk, moderate frame, muscle, balance, center body dimension, pigment and favourable genomic-enhanced breeding values for performance/maternal/end product values continues to be the scope of our breeding priorities.

Working to attract a youthful generation of cost and resource conscious producers is very fulfilling for us. Yet, equally satisfying is breeding gentle, versatile and efficient cattle to make life more pleasant for established operators. The most powerful tool a commercial producer has at their disposal is heterosis or hybrid vigour, derived from a structured crossbreeding system. This is especially true for lowly heritable traits like fertility and longevity- the REAL PROFIT DRIVERS. Fortunately, Herefords are a pure outcross to optimize heterosis on solid black, red, and white cows. Consider that every GENUINE BALDY bred or open female that demands a premium on the replacement market is surprisingly part Hereford...

We would love to host you Thursday, December 7th, 2023 at 4:30 MT. Please consider taking a night off from the farm or ranch to bring your family and friends to our pre-Christmas event. Please reach out to us at 306-903-7299 if we can do anything to assist you.

Sincerely,

Lance & Shari Leachman

About **BIG GULLY** farm

Acquiring Genetics: Our AI and natural herd sires are acquired from humble, hard working and professional families throughout Canada and the United States. Our intent is to source from breeders that couple: maternal productivity, visual distinction, comprehensive data collection, carcass ultrasound testing and genomic-enhanced EPD's. Moreover, these genetic providers focus on commercial bull production and operate in environments typically harsher than our own.

Breeding: We heavily utilize artificial insemination on sires that we either own, have personally evaluated or have great confidence in based on research and testimonials. We will AI as many cows on natural heats as possible for the first 1-2 cycles and then turn out herd bulls. First calf heifers are now bull bred from the start of the season. Typically, we synchronize all the replacements for a timed AI, along with heat detection-then turn bulls in immediately.

Bull/Cowherd Nutrition: Bull calves and long yearling bulls are developed with hammer milled oats and protein supplement and provided hay, along with free choice mineral/salt. The cowherd grazes native/tame pasture and then transitions to corn grazing prior to and after calving. On corn they are provided a free choice high calcium mineral, along with salt. Just prior to calving, they are penned close to the yard and fed hay or greenfeed

temporarily. Similarly, those will be the two options they are fed before heading to summer pasture.

Herd Health: Calves (Birth): Nasalgen 3-PMH, Vitaferst, Toltrazuril, Multimin 90. Calves (Pasture Turnout): Bovi-Shield Gold One-Shot, Tasvax 8, Solmectin. Calves (Pre-Weaning): Bovi-Shield Gold FP5, Tasvax 8, Safeguard, Solmectin, Multimin 90. Cows/Replacements/Yearling Bulls (Pre-Breeding): Bovi-Shield Gold FP5, Tasvax 8. Cows/Replacements/Yearling Bulls (Pasture Turnout): Solmectin. Cows/Bred Heifers (Weaning): Tasvax 8, Scour Bos 9. Bred Heifers (Pre-Calving): Scour Bos 4, Multimin 90.

Our BUYER *incentives*

Volume Buyer Discount: Buy two or more bulls and receive 3% discount on each purchase.

Purchase Inclusions: Wintering, Breeding Soundness Exam, Carcass Ultrasound Scan & Delivery.

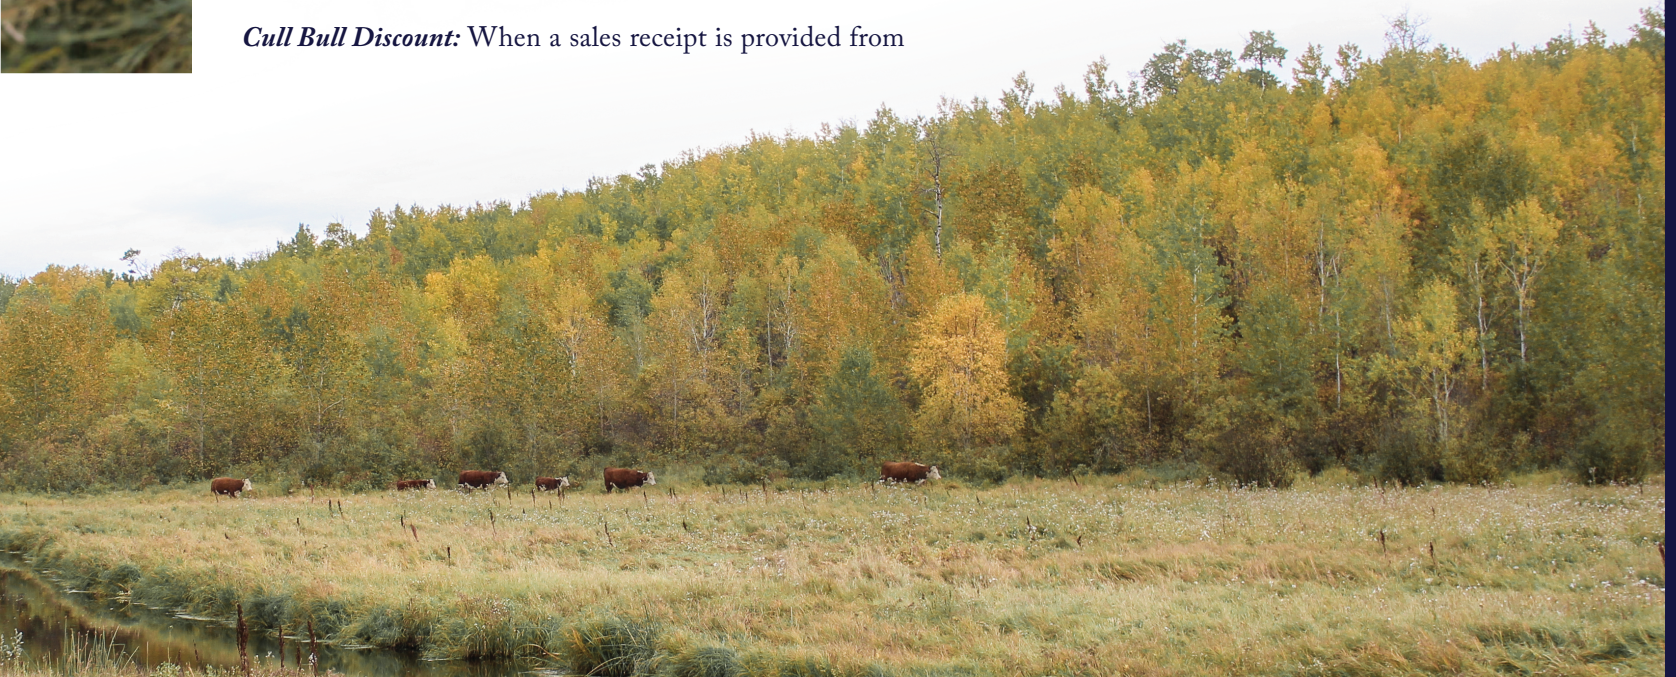

Repeat Buyer Discount: Enjoy 2% off of your purchase if you've bought a bull in the past from Big Gully Farm.

Deferred Payment Plan: Considering our sale falls early in the season, we are willing to individually work out a favourable payment plan with you when discussed prior to the sale. Deferring payment to 2023 is an option.

Cull Bull Discount: When a sales receipt is provided from

the sale of a cull bull during the summer or fall immediately (post-breeding) before the sale, \$250 will be discounted from the purchase of your new sire. Only one discount can be applied per bull purchase. SALES RECEIPT MUST BE E-MAILED PRIOR TO SALE FOR DISCOUNT TO BE ELIGIBLE AND ISSUED.

Bull Refund/Exchange Policy: Understanding that a bull may not pass a spring semen test or not develop to satisfaction, we will gladly provide a FULL REFUND or EXCHANGE with a spare bull or provide a herd bull for the breeding season. We AVOID issuing sale credit.

Pursuit's a long sided, fast growing, sound moving calf that is smooth, heterozygous polled. His sire, Historic 81E, consistently breeds udder quality, apparent milk, calving ease, center body dimension, calving ease and hair. A heifer's initial calf, he projects strong values for growth, milk, udder quality and ribeye.

Resonate is attractive, deep and correctly built from the profile-with pigment and markings to suit current preferences. Dam is a really strong first calf heifer out of Historic 81E, therefore possessing exceptional udder quality and easily maintaining body condition during her initial effort.

3

BIG-GULLY 46J APPARITION 25L

Apparition was an early standout as a dark colored, red eyed attractive, homo polled option. He is level lined, square hipped and muscular. His home raised sire, was a high seller two years ago and simply left a disproportionately larger group of strong heifer calves. His dam is a moderate framed, deep middle daughter of All Star A191-a bull whose daughters are productive and advance genetic values.

4

BIG-GULLY 4013 LANDFALL 61L

Landfall is the total package in our opinion. A homo polled, bold middled, stout and large testicled potential sire. His dam has proven to be the strongest blend of phenotype and production from the Phantom Creek cows we purchased-she is a really engaging female. His genetic profile features breeding strength across an array of traits. **CONSIDERING RETAINING AN INTEREST.**

5

BIG-GULLY 4013 ENVISION 64L

| 97.7 | 23.2 | 1.4 | 1.4 | 170.6 | 213.9 | 0.061 | 0.4 | 0.35 | 73.2 |

Envision is a typical 4013 son-extra center body dimension, strong growth and stout featured. Dam is a powerfully built, bold centered cow with excellent structure and pigment. We have continued to utilize the 4013 sire via AI for their commercial acceptance, but more specifically advancement in growth, marbling and maternal productivity.

6

BIG-GULLY 183F VALIDATION 68L

Diligent is out of the oldest cow on the farm—a female that is consistently productive with excellent foot and udder quality relative to her age. Complete would accurately describe this bull—sound structured, smooth shouldered, long sided and square hipped. His dam is a Bounty Hunter 517U daughter and has been mated to a variety of sires over the years with success.

Tier One is a horned calf we love for his physical build and quality. He is a young calf that generated the most impressive performance in this bull calf crop, relative to age. Youthful appearing, yet stout, bold middled, agile at the ground and always full in his appearance. Dam is easy fleshing with excellent center body dimension and flank depth. **CONSIDERING RETAINING AN INTEREST.**

Rectify has the characteristics of a solid commercial bull. Big ribbed, long, stout boned, sound on the move and hairy. His dam is our second oldest female in production and has put several daughters back in the herd—consistently transmitting strong growth, volume and stoutness. Same is true for this son out of the Frontier 6147 sire.

Deposition has the attitude of a herd bull-always following cycling cows and bugling. He is a high performing, hard muscled, long bodied calf with plenty of stoutness and maturity. Dam is a middle-aged cow with admirable center body shape, ability to maintain body condition and a correct udder. We continue to utilize his sire, Long Range 203D, because the sons are big, stout, large testicled and commercially relevant.

Composure is another practical son of our calving ease, heifer sire-Settler 190H. Like his siblings, this bull is athletic on the move, short marked, deep middled and well balanced. His first calf mother is refined in her udder and strong in her udder attachment, respectively. A calf that is complete and should offer strong maternal competence in a set of replacement daughters.

Epitome is deep ribbed, short marked and sound in motion. His genetic script is exemplary across a variety of traits. His first calf dam is moderate framed, well balanced, correct uddered and big middled. These Masterplan 183F sons were consistently modest sized at birth, yet generate impressive growth-particularly being used solely on heifers.

Rectify is a dark red, fully pigmented calf that is long bodied, larger statured, level lined and easy traveling. His sire, Jupiter 11J, was our choice of the Phantom Creek private treaty bull calf pen in the fall of 2021-a sire with exceptional early growth, yet stayed acceptable in mature stature. His dam is a striking, powerful female with a wide, square top and well suspended udder.

Verdict generated impressive performance considering his moderate birthweight and being a heifer's first calf. He is red eyed, long sided, deep bodied, and sound traveling. Genetically, he charts impressive predictions for growth, maternal calving ease and carcass merit. His Long Range 203D sire dam is similarly long, deep with small teats and strong apparent milk.

21

BIG-GULLY 308F JURY DUTY 833L

Jury Duty is a bold ribbed, deep sided, thick ended calf that has an easy fleshing look. We really like his dam for her udder quality, huge ribcage and maternal productivity. Random observation, but his dam and grandam are 2 of the 4 cows who won't fit our alleyways to administer scour vaccine pre-parturition. He should offer breeding versatility based on his physical merit and strong multi-trait estimates.

22

BIG-GULLY 87G SKYFALL 835L

Skyfall is easily identifiable with his big red goggle eyes and earlier developing masculinity. He always has extra presence with his attractive neck to shoulder attachment, balance, strength of top and muscle shape. His dam is a moderate sized, broody, big bodied female that easily maintains body condition. We think highly of this bull and considering his build and shape, suggest he would have strong calving ease also. **CONSIDERING RETAINING AN INTEREST.**

23

BIG-GULLY 87G TRUSTFALL 953L

133K is a heterozygous polled heifer's first calf. His dam is moderate, bold middled, appears heavy milking and correct in her udder. Similarly, 133K is moderate framed, deep sided and travels with ease and flexibility. The maternal strength on both sides of the pedigree lends itself to commercial replacement heifer production. **Note this bull is MDC.**

Surge is heterozygous polled and arrived at 80 lbs from an aged cow. Maternally, this bull probably has as much genuine calving ease as any bull in the sale. His dam always moderated birth, while maintaining one of the highest quality udders in the herd at an advanced age of production. This bull is smooth shouldered, strong topped, nice structured and sound on the move.

CIE-EPD

ONLINE *bidding*

Sale Start: The sale will begin at 4:30 p.m. MST on December 7. Videos of the sale lots can be viewed at www.biggullyfarm.com

How To Participate: In order to participate in the auction online you will need to pre-register and obtain a buyer number. Go to the liveauctions.tv website, www.liveauctions.tv, and select Big Gully Farm Bull Sale (you may need to create a user name and password if this is your first time). After logging in select the link that says, “register for a buyer number.” This form requires you to fill out your bank’s name, city, state, phone number and a contact. You may register to bid after bidding has opened but please remember that authorization to bid is not instantaneous.

How The Auction Works: Once you have a username and have received a buyer number then you are ready to bid. You will see a screen that is unique to your user ID. There will be a list containing the sale lots. If you click on a lot, the video clip or photo will be

displayed to the right. The next bid, current price, proxy bid, and manual bid buttons will be displayed below the video area. This page will react to your bids by stating, “you are in” or “you are out.” No one else will be able to see your bid – that data is not accessible to the public. Each time you login, the auction screen will display your personal bidding information. Your auction screen is unique and private displaying your activity to only you. Remember that you must have the lot that you are bidding on selected. This is where it tells you if you are in or out. It is here where you can also see your proxy (automatic) bid settings as applicable.

What is a Proxy Bid?: With a proxy bid you can enter your maximum bid and then sit back and watch. When you enter a proxy bid amount the LiveAuctions system automatically bids on your behalf up to your maximum bid. If the lot closes out for less than your maximum, that’s all you’ll have to pay. This means that you don’t have to keep coming back to re-

bid every time another bid is placed. This makes it more convenient and less time consuming. It can also greatly assist those breeders that can’t be near a computer or are busy with other duties at the time of the final bidding. Your maximum amount is kept confidential from other bidders and the seller. Even though you can see this amount on your screen, no one else can. The LiveAuctions system compares your bid to those of the other registered bidders and the system automatically places bids on your behalf, using only as much of your bid as is necessary to maintain your high bid position. The system will bid only up to your maximum amount as necessary to maintain you as the high bidder. If another bidder has a higher maximum, you’ll be outbid and the system will tell you that “YOU’RE OUT.” But, if no other bidder has a higher maximum you win the final bid.

Questions & Assistance: If you have any questions or require assistance, please contact Nicki Ross, 587-377-1580.

TERMS & *conditions*

Terms of Settlement: The terms of the sale are cash or cheque, payable at par. The right of property shall not pass until settlement is made. All settlements must be made with clerks of the sale before cattle will be released. Payment terms can be arranged if you discuss them with Lance prior to the sale.

Bids & Disputes: Every animal in the video sale will be sold to the highest bidder. In case of disputes, bidding will be re-opened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer’s decision in such matters will be final.

Liability: Although every precaution will be taken to protect the safety and comfort of buyers, the auctioneer or

owners assume no responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

Purchaser’s Risk: Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser’s risk for a reasonable length of time.

Certificate of Registration: Each animal will carry papers issued by the Canadian Hereford Association. A certificate of registry duly transferred will be furnished to the buyer for each animal immediately after payment has been made.

Announcements: All announcements made from the auction block will take precedence over the printed matter in the catalogue.

Buyers are therefore cautioned to pay close attention to such disclosures.

US Funds & Export: Current exchange rates will be announced sale day. Big Gully Farm will do all the health testing and export papers required for shipment. We will deliver the cattle across the border and assist in further shipping arrangements from there. Cost is the responsibility of the buyer from that point on.

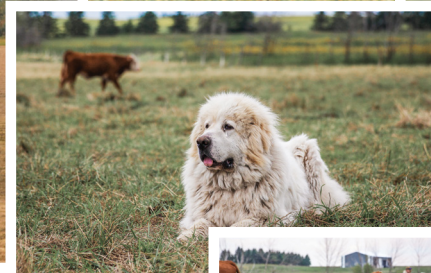

Absentee Bids: Bidders unable to attend the sale may phone their bids and instructions to the auctioneer, ringman or special representatives. Bids must be received in sufficient time prior to the sale.

The LEARNING *award*

We have decided to alter the Big Gully Farm Beef Cattle Learning Award to more intimately give back to the families whose support we have been fortunate to receive through their bull acquisitions. The purchaser of each bull will be entered in a draw for 3 awards of \$1000 each. Each successful draw winner will then have to choose one or more youth to be sent that award in its entirety or divided portion, respectively.

Youth must use the award on beef cattle-related experience such as an AI course, workshop, 4-H/breeding animal purchase, animal science tuition, etc. Successful youth may only receive one award per year.
