LUNCH 11:30 • SALE AT 12:30

AT THE RANCH IN VALIER, MONTANA

View Holden Hereford's Sale Live on Satellite TV with Superior

HERE'S HOW IT WORKS

HOW TO PARTICIPATE AS AN ABSENTEE BUYER - We prefer for each of you to be in attendance on sale day. Realistically, we know there will be some scheduling conflicts and distance limitations. In these cases, we have arranged for you to be able to participate in the sale on an absentee basis. If possible, you can come by and evaluate the animals prior to sale day. If distance is a problem, we can also provide you with a DVD of all the cattle for home viewing. All of the lots in the sale will be available for viewing online prior to sale day at www.superiorlivestock.com as well. Customers tell us the video does a good job of showing conformation, structural correctness and how the cattle travel, etc. Our sale book, with complete data on each animal, is very helpful. Please feel free to call us with questions. In addition, there will be qualified persons on hand sale day to evaluate the bulls and answer any questions you might have.

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's newest way to buy cattle! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member.

From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on Dish Network channel 232. Please note that there is a short delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed to view the auction. If you do not currently have DISH Network, but would like assistance in signing up, Superior has setup a hotline to assist our customers in making the switch at (888) 999-6656.

Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements.

View and Bid Live on the Internet

Real-time bidding is available via the internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale. Buyers must create an account prior to the sale.

Please visit www.LiveAuctions.tv to create an account and request a buyer number. Instructions are available at www.LiveAuctions.tv to walk you through the account setup process.

Buyers who would like to bid via the internet must register with LiveAuctions.tv two days prior to the sale.

Brad Holden (406) 590-3307

This is our invitation for you to attend our 50th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is our strongest sale offering ever. It is also the largest sale offering we have ever offered for sale and we feel the depth of quality is absolutely outstanding. It's hard to believe that it has been 50 years since the 1st Cooper-Holden Production sale was held in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 50 sales. The Hereford business has been great to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for heterosis and extra profit for your operation. We have enjoyed are part in working to produce Hereford cattle that will perform well in all segments of the beef industry and look forward to many more years of raising the best Herefords possible. We plan on having a special celebration to mark our 50th sale milestone so please come and enjoy our hospitality and a great time.

Once again we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 120 out of almost 165 bull calves born in our 2015 calf crop. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2014 calf crop. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. 100% of the sale offering with the exception of the fall pairs, have GE EPDs on them to improve the accuracy of their EPDs. They will also sell with complete ultrasound and performance data and all bulls have been semen tested. We have a couple special "pick of the Flush" heifer lots in the sale again this year and this is a chance to get a great young foundation female. Both of these "pick" lots are full sisters to some of the top yearling bulls selling in the sale. We have a select group of our natural fall heifer calf pairs in the sale and will be selling the choice of cow or calf and we will keep the other. We have a top quality set of 30 open yearling heifers in the sale also. All sale cattle except fall heifer calves have been DNA parentage verified and tested free for all known genetic defects. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 60 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 12th, 13th, and 14th for your inspection. Lunch and snacks will be provided on both March 13th and sale day. There will be a social hour and dinner at the Lighthouse Restaurant on March 13th from 6:30 to 8:00 p.m. Please come and be our guests.

We are excited to once again be broadcasting our sale live on Superior Productions on RuralTV, which is Dish Network channel 232. Unfortunately, DirecTV is not a carrier for RuralTV yet, but hopefully will be later this year. We will start selling cattle promptly at 12:30 p.m. to try and get all the lots through in our allotted time. DVDs of the sale cattle will be available through us or Superior. Please contact either one of us and we will be happy to send one out to you. We also offer live sale viewing and bidding on the internet with LiveAuctions.tv. Details on how to participate with either Superior Productions or Live Auctions can be found on the inside front cover of our catalog.

Thank you for your interest in our program. Please feel free to stop by and inspect the cattle at any time, and if we can help you out in any way, please give us a call.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

www.holdenherefords.com

DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate on the phone with Superior Livestock may place a phone bid by contacting any listed sale representative, Jack Holden, or Jay D. Evans. DVD's of the sale cattle will be available. Please contact us for more information.

TRAVEL AND ACCOMMODATIONS

Holden Hereford Bull Sale Special

**When you register, tell the clerk that you are with the
Holden Hereford group and you will receive a 10% discount.**

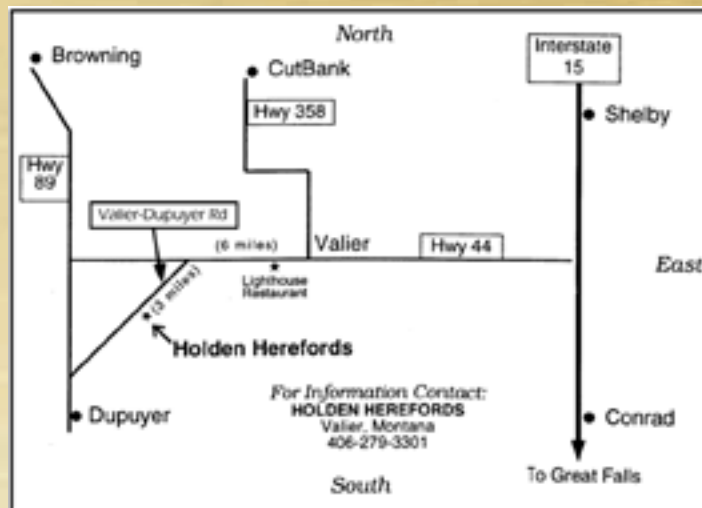

Advance reservations required.
Not valid in conjunction with other discounts.

THERE'S NEVER BEEN A BETTER TIME TO CAPITALIZE ON THE VALUE OF USING HEREFORD BULLS ON YOUR ANGUS BASED COWHERD

Using Hereford bulls on Angus-based cows will give producers advantages in profitability, cash flow, herd size, and retained female fertility and longevity according to a recently completed study at Circle A Angus Ranch. In fact, when the data was further analyzed for economic emphasis, the results showed an advantage of \$514 net per cow over a period of 10 years. That's a \$51 difference per cow per year.

Economic models also predicted that if replacement females are retained over a period of 10 years, Hereford-sired females will generate a 20% advantage in herd size for the same relative cost versus the straight Angus commercial cows because of increased fertility and longevity.

**There will be a social hour and
Prime Rib dinner at the
Lighthouse Restaurant,
1 1/2 miles west of Valier
on March 13th from 6:30 to 8:00 p.m.
Please Come And Be Our Guests!!!**

**Holden Herefords is 9 miles west of Valier
on the cutoff road to Dupuyer.
Take Highway 44 for 6 miles and
then the left-hand fork off the highway.
You can't miss it!**

♦ 144Y was the 2nd high selling bull in Cooper's 2012 Sale at \$55,000 and he is a maternal brother to the CL 1 Domino 955W bull that has been used around the U.S. and the world. He is extra deep bodied, big footed, and thick topped. His progeny are stylish and well balanced in their makeup. He has an excellent EPD profile across the board. Only a few sons sell out of 144Y, but it is a very strong sire group.

♦ 1069Y is a proven herd sire that has really worked well for us. He is a well balanced, super attractive bull with a big hip, extra length of body, and plenty of volume and capacity. He is out of a top donor cow that also produced the 9144W herd sire for us that topped our 2010 sale and she sold for \$29,000 in our 2013 Female Sale to Flying S Herefords. He has 3 full sisters in production that are all donor quality and have picture perfect udders. 1069Y ranks in the top 10% of breed on Milk EPD and the top 3% on MARB EPD.

♦ 1098Y topped our 2012 Sale at \$102,000 to Harrison Cattle Co. and Flying S Herefords. He is a strong sire of performance, muscle expression, length, and eye appeal along with loads of pigment. He is a trait leader for Calving Ease, Milk, M&G, Teat Size, Fat, and REA EPDs and SCHB. He is backed by one of our very best cow families and his maternal granddam produced over \$250,000 in progeny sales. His first daughters are in production now and are looking like outstanding young females.

♦ We purchased this powerhouse bull as a performance, maternal, and carcass sire in Cooper's 2014 Sale and he has done all that we expected. The 333A progeny have extra spring of rib and volume and are long bodied and stout made with a big rugged look to them. His progeny are the type that will perform in the feedlot and hang on the rail and still leave you with a great set of daughters.

♦ 3006A is a rising star in our program and for the breed. He is a true curve bender that covers all the bases from easy calving to growth to maternal and carcass strength. His progeny are deep sided, long bodied, well marked, and extra fancy. He topped our 2014 sale at \$80,000 for 1/2 interest and is living up to every one of his expectations so far. He ranks in the top 15% of the breed on BW, WW, and MARB EPDs and the top 5% on Scrotal, Milk, and M&G EPDs and \$CHB. He has an outstanding set of first sons to sell this year and will be a huge part of our breeding program going forward.

EXPLANATION OF BREED EPDS

CALVING EASE- DIRECT (CED)

EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving. The EPD for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

BIRTH WEIGHT (BW)

The BW EPD is an indicator of birth weight and calving ease. Progeny sired by a bull with a BW EPD of 2.2 can be expected to weigh 3.2 lb. more at birth, on average, than progeny sired by a bull with an EPD of -1.0 lb. (2.2 minus -1.0 = 3.2 lb.) Birth weight is another indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

WEANING WEIGHT (WW)

The WW EPD reflects pre-weaning growth potential. Measured from adjusted 205-day weight. It is an indicator of direct genes for growth independent of milk production of the dam. Calves sired by a bull with a WW EPD of 30 should have a 20 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of +10 lb. (30 minus 10.0 = 20 lb.).

YEARLING WEIGHT (YW)

YW EPD for a sire with an EPD of 87 indicates that on average, his progeny should be 30 lb. above the average of progeny of a bull with an EPD of 57 lb. YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

MATERNAL MILK & GROWTH (M+G)

The M+G EPD is a combination EPD. It is the MM EPD plus 1/2 the WW EPD. It has no accuracy value since it is simply a combination of two other EPDs. A sire's MG EPD reflects what he is expected to transmit to his daughters for a combination of both growth genetics (WW EPD) and maternal production (MM EPD). This EPD is sometimes referred to as "total maternal" or "combined maternal."

MATERNAL MILK EPD (MILK)

The MILK EPD is a prediction of weaning weight differences due to milk and maternal ability of the dam. For a sire, the MILK EPD predicts the maternal ability of his daughters expressed in pounds of calf weaned. MILK EPDs do not specifically predict pounds of milk produced, but pounds of calf weaned due to maternal production of the dam. It predicts the difference in average weaning weight of sires' daughter's progeny due to milking ability. Daughters of a sire with a MILK EPD of 14 should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MILK EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production over the entire lactation period.

SCROTAL CIRCUMFERENCE (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPD suggest younger age at puberty. Yearling sons of a sire with an EPD of 0.7 should have yearling scrotal circumference measurements that average 0.7 cm. larger than progeny by a bull with an EPD of 0.0. In this genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have an SC EPD.

RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measures based on ultrasound measurements of live yearling cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs

MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day intramuscular fat (marbling) score based on ultrasound measurements of live yearling cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of intramuscular fat and therefore higher quality grades.

Certified Hereford Beef Index (\$CHB)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

GENOMIC ENHANCED EPDS

Over the past few years, the American Hereford Association (AHA) has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into National Cattle Evaluation (NCE) to enhance the predictive power of EPD. Genomic Enhanced EPD (GE-EPD) allows commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information of Hereford Genetics. The AHA utilizes a 77K, High Density (HD) panel that was built off of high accuracy Hereford sires. Each Animal that is tested has an updated set of EPD and corresponding accuracy. For some traits, the added accuracy will increase by 100%, and moving from .15 to over .30 means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed. The use of this information reduces your risk when buying, and helps to plan mating based off of all information available.

What are the advantages of GE-EPDs?

- Much higher accuracy EPDs for unproven cattle
- Provide reliable EPDs for traits that are difficult to measure
- Faster generation turnover with fewer mistakes
- Simple, easy to interpret results with "all-in-one" value

What is the value of EPD accuracy?

- Faster rate of genetic progress
- Feed and labor cost savings in seedstock development
- Opportunity cost of making the wrong decision
- Value of time in relation to earlier selection and more information for marketing and customer relations.

YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2015 calf crop. This is the largest sets of yearling bulls we have ever offered for sale, and we feel they are the best set we have offered in our 50 years of sales. The quality and uniformity in this group from top to bottom is outstanding. They are stout made, well marked and have top notch performance and ultrasound data to back it up. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they are all parentage verified and tested negative for all genetic defects. We invite you to look them over, and we feel you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also and over 50% are from our extensive ET program.

The average EPDs on this group of bulls is CED +2.0 BW +2.8 WW +53 YW +84 Milk +32 M&G +59 REA +.18 MARB +.10

Compare this to the breed averages of CED +1.1 BW +3.3 WW +48 YW +78 Milk +20 M&G +44 REA +.31 MARB +.09

You will see how strong this group is on all traits across the board. Combine this with 60 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production. These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.5 lbs. a day on a 130 day gain test and have an average 205 day weight of 730 lbs. and an average 365 day weight of 1310 lbs. They also scanned an average REA of 13.13, an average IMF score of 2.88%, and an average REA per 100/wt. of 1.05 with an average Backfat of .33 inch.

Scrotal Measurements were taken on 2-6-2016

TOP HERD BULL PROSPECT

Here is a bull with a lot of future and I think he will find a lot of friends on sale day. 5057C is goggle eyed, clean shouldered, great fronted, long bodied, and has plenty of volume and thickness. He has strong individual performance, scan data, and great testides. His dam is a 12 year old Cooper cow that we bought in 2014. She is great uddered and super sound and the kind that will keep you in the cattle business. She is also the dam of their 1161Y herd sire. I feel 5057C would work on heifers and he has potential to be a great young sire.

**Curve Bender
Herd Bull
Prospect**

5107C

5107C is an elite herd bull prospect that checks all the boxes. He is well marked, big topped, square made, sound structured, big ribbed bull with eye appeal to burn. He has an EPD profile that combines calving ease with exceptional growth, maternal, and carcass strength. To top it all off he is out of a great donor cow, and is a maternal brother to our 3297A herd sire. If we didn't already have two 215Z sons in use, we would retain him for our own use. Help yourself to a very special individual here!

TOP HERD BULL PROSPECT

5132C is a calving ease bull that is moderate framed, deep sided, thick topped, and easy on the eye. He is a sure fire heifer bull that is strong on performance and has tremendous maternal strength. His dam is the \$95,000 6155S donor cow that has been such a great producer for us. Loads of genetic potential here!

- ♦ 74 lb birth weight and .3 BW EPD
- ♦ Top 10% on CED and BW EPDs
- ♦ Top 1% on Milk and M&G EPDs
- ♦ Full brothers sell as Lots 5067C and 5149C

HERD BULL PROSPECT

5179C is the natural calf out of the dam of the featured Lot 5019C and 5044C bulls, and he is really good in his own right. He has excellent EPDs across the board including carcass, has a pedigree loaded with top cow families, and the phenotype to back it up. This bull is loaded with genetic potential. Look him up.

- ♦ Top 1% on Milk and M&G EPDs
- ♦ Top 10% on WW and YW EPDs
- ♦ 800 lb. weaning weight and over 1400 lbs at a year
- ♦ Dam has an avg. NR of 106 and avg. YR of 106
- ♦ Maternal brothers sell as Lots 5019C, 5026C, 5030C, and 5044C
- ♦ Maternal sisters sell as "Pick of Flush" lot

CURVE BENDER HERD BULL PROSPECT

5185C is a sure shot heifer bull that also has phenomenal performance and maternal strength. He is very clean shouldered, has great neck extension, is extra long bodied, and has good muscle shape and eye appeal. Not many -.4 BW EPD bulls can also have an adj. 205 day weight of 800 lbs. and a adj. 365 day wt of 1400 lbs. His dam is a perfect uddered, moderate framed, well marked cow out of a top cow family. Here is a bull with lots to offer!

- ♦ Top 3% on BW, Milk, and M&G EPDs
- ♦ Top 10% on CED and Scrotal EPDs

5191C is very moderate framed but he has tremendous volume and capacity and thickness down his top and through his rear quarter. He is also very well marked and stylish. His dam is a 13 year old Miles City cow that has been a donor for us. She is great uddered, well marked, and super sound for her age. If you are looking to moderate some frame and add capacity, 5191C is a good option. He would be a great fit in a grass fat operation.

POWERHOUSE HERD BULL PROSPECT

This goggle eyed, well marked 221 son is a hoss. He is long bodied and extra thick with exceptional individual performance. He is the biggest scrotal bull in the sale and also the top bull on YW EPD. Dam is a super uddered, well marked donor cow out of a great cow family. If you sell cattle by the pound here is one to look at.

- ♦ Top 2% of breed on Yw, Scrotal, Milk, and M&G EPDs
- ♦ Top 3% on WW EPD
- ♦ Ratioed 106 on REA
- ♦ Maternal brother to the Lot 5148C bull that we are retaining an interest in

TOP HERD BULL PROSPECT

The more you study this bull the more you like him. He is goggle eyed, deep sided, great fronted, and has great muscle expression. He is free moving and has extra eye appeal. When you look at his individual performance and scan data, and then look at how he is bred you like him even more. His dam is a top 955 daughter out of the great 440 Cooper cow. She is great uddered and extra fancy, and she will be a major part of our ET program as we go forward. Great combination of EPDs, phenotypic, and pedigree in this outstanding bull.

TOP SHELF HERD BULL PROSPECT

5304C is a real eye catcher and has a great pattern. He is level in his design, huge topped, and thick butted, with extra spring of rib and lower quarter. He is smooth moving, big footed, and you have to love how clean fronted he is and how his neck comes out of his shoulder. His dam is a premier donor cow out of the 5139R x 7034T flush. She is deep sided, great uddered, and feminine fronted. Here is a show stopper with tremendous individual performance and EPDs and a pedigree loaded with cow power.

- ♦ Top 3% on Milk and M&G EPDs

TOP HERD BULL PROSPECT

5305C is a lighter colored, well marked bull with a great look to him. He is soft made, deep sided, big boned, and extra fancy. He has great testicular development and is smooth moving and deep quartered. He is backed by an exceptional donor cow and a great cow family. The 5139R descendants all have a great look about them especially through the shoulder and up through their front end. Don't overlook this bull because of his age. He is loaded with potential!

- ♦ Top 3% on Scrotal EPD
- ♦ Top 10% on Milk EPD
- ♦ Top 15% on M&G EPD
- ♦ 3 full sisters to the dam have sold for an average of \$34,000

PREMIER HERD BULL PROSPECT

4313B is the bull that everyone spots when they go in this group. He is very complete in his phenotype; long bodied, straight topped, thick quartered, big footed, easy moving, with loads of character and eye appeal. He has outstanding individual performance, and is out of a great Miles City cow that is perfect uddered. She is a donor for us now and a maternal sister to the 03482 Miles City Cow that we have been flushing also. This a great pedigree combined with the look we are all trying to produce.

- ♦ Ratioed 117 on REA
- ♦ Top 15% on YW EPD
- ♦ Heaviest bull in the group at 1690 lbs on 1-31-2016
- ♦ Retaining a 1/4 in herd semen interest

Dam of Flush Pick #1

PICK OF FLUSH #1

Here is an incredible opportunity to buy a foundation female that combines phenomenal EPDs, phenotype, and a pedigree loaded with cow power. The pedigree on these heifers combines premier cow families from our herd and Cooper's. Their dam is the 1072Y cow that is a flush mate to our 1013Y herd sire and a granddaughter of the \$175,000 5139R cow combined with the great 055X and 475P donor cows from Cooper's on the sire side. This is a no miss mating that combines all that today's beef industry demands!

Dam of Flush Pick #2

PICK OF FLUSH #2

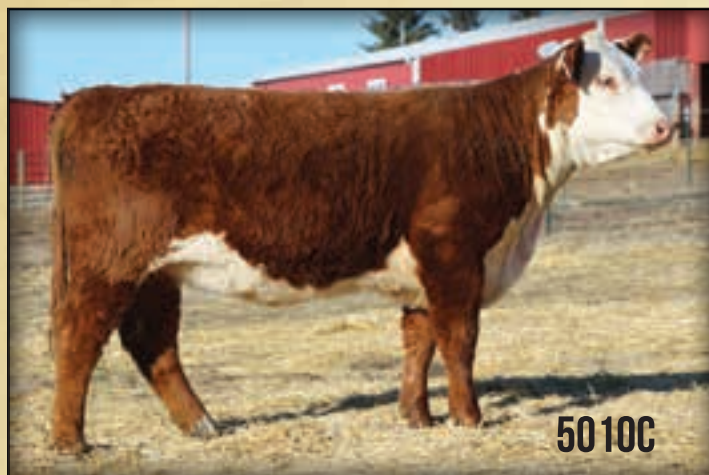

If you are looking for a future donor with power and eye appeal, here is a great opportunity. These heifers have tremendous EPDs and are well marked, extra fancy, and stout. Their dam is a top donor cow with a perfect udder and she is as classy as they come. Her dam is a top donor cow for us also and produced a \$38,000 bred heifer for Hoffman's last fall. On the sire side you get all the power of 1161Y and his great dam the 4126P donor cow. To top it off the full brothers in this flush are outstanding also. Help yourself to a great young female here!

YEARLING HEIFERS

This is an exceptional set of heifers in the sale this year. This is the largest group of heifers that we have ever offered in our spring sale, and we cut deep into our replacements to put forth a set worthy of our 50th Sale. The depth of quality, and type and kind in this group is outstanding. There are many future donor prospects and foundation females out of great cow families combined with great EPDs.

Average EPDs for this group CED +2.6 BW +2.8 WW +49 YW +78 Milk +31 M&G +56 REA +.08 MARB +.19

The average heifer in this group ranks in the top 5% of the breed on Milk, the top 10% on M&G, the top 25% on Calving Ease, and the top 20% on MARB EPDs. We feel this is a real testament to the maternal strength of our cowherd, and to the value there is in this group of heifers to help build your cowherd.

I encourage you to go through the videos on this group of heifers and see the quality in them.

50th Annual Production Sale
Holden Herefords

FALL PAIRS

This is the smallest group of fall pairs we have offered in the sale in a few years, but it is a very elite group. They are mostly very young cows and there are some fantastic calves on them. Included in this group will be the first opportunity to buy heifer calves out of HH Advance 3297A and HH Advance 3006A. We will sell choice on these pairs. Buyer has the option of taking the cow or the heifer calf. This year we are doing it a little different. If you want to keep the pair together, you can double your bid. If not, we will keep the remaining female. Cows are exposed to HH Advance 1013Y or CL 1 Domino 420B. Pregnancy status available at sale time.
