Welcome to our 41st Annual Production Sale!

A special thank you for the support and loyalty of our friends and customers. We also appreciate any new interest in our program, and pledge to provide any additional information needed.

As Red Angus continues to be a more prominent beef breed, we endorse the challenge of verifying the genetic value of our cattle through collecting and analyzing data with actual measurements, as well as DNA and ultrasound technology. Our herd sires and total cowherd have all been genomically tested and parentage verified to insure the most accurate numbers possible on all progeny.

USDA now recognizes the Red Angus breed as Angus for inclusion in most Angus branded beef programs. Hopefully this live animal specification, also called G schedule will resolve the black hide bias in the market. However, this also imposes a more stringent demand on selection for carcass qualities in our cattle, especially marbling which translates to more upper 2/3 choice and prime quality grades. See our Bag-A-Bull and EID tag offer on page 4 to verify quality traceability.

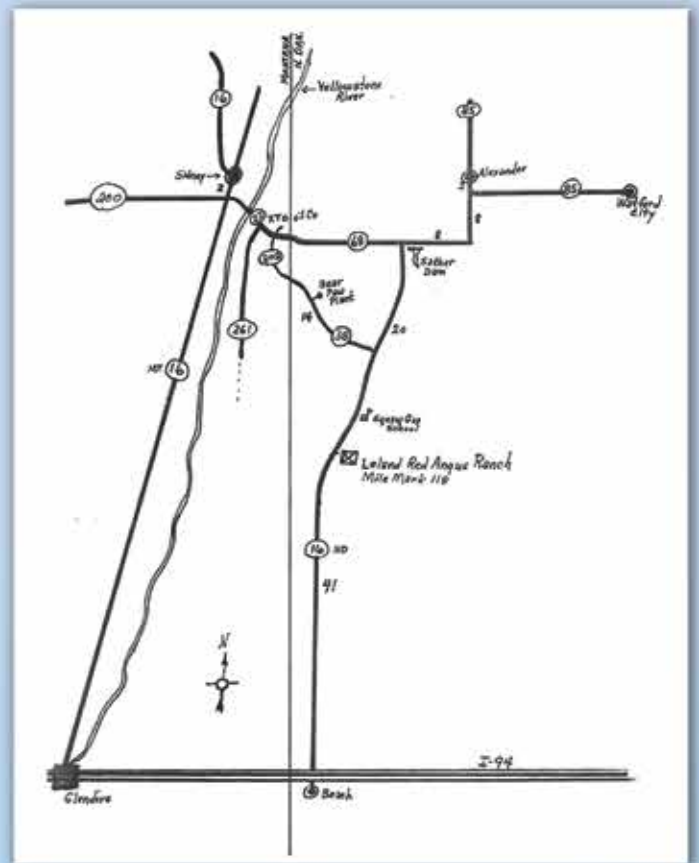

We conduct rigid selection practices to ensure the most accurate information available. These include traits not measured by the computer, but by cowboy logic – traits such as foot and udder structure, disposition, fleshing ability and survivability. Our cattle are guaranteed breeders, with the bulls passing a breeding soundness and semen evaluation. Heifers are guaranteed open and ready to breed.

We do recommend insurance, particularly on yearling bulls when used in multiple breeding groups with older bulls.

As always, we are happy to assist in any specific needs you may have for your program and guarantee confidentiality, as well as lowest bid, on any sight-unseen purchases.

We continue to offer free delivery to central points up to 500 miles. Historically, when possible, we have delivered direct to your yard. However, due to age constraints and labor shortages, we may have to ask customers to accept central points, with every effort to make it as convenient as possible.

*Best wishes from all of us at
Leland Red Angus &
Koester Red Angus*

DVAuction Broadcasting Real-time Auctions

We are pleased to offer the Leland Red Angus Sale broadcast "live" over the Internet through DVAuction Services.

First Time Users:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab.
- Complete "Registration" and "Applying to Bid" at Leland Red Angus.
- Please view the tutorial available on our home page for bidding instructions.
- Proxy bidding is available before sale day and during the auction.
- You will be assigned a buyer number once you purchase.

We will be contacting your bank to verify information.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home.

After the sale:

- Contact Leland Red Angus for delivery or pickup and payment arrangements.

Note: You must have high-speed internet access (DSL, T-1 or Broadband) to be able to bid during the sale. Any questions: Contact Tami with DVAuction at (308)-870-3661, tmcintosh@dvauction.com.

We recommend that you register by March 7, 2024, for on-line bidding. Every attempt will be made to complete your application, even if it is on sale day.

GENERAL INFORMATION

FRIDAY, MARCH 8, 2024

Sale will begin at 1 p.m. MST
Cattle may be viewed any time prior to sale day.

LUNCH

A free noon lunch will be served on sale day.

TRANSPORTATION

Sidney is served by Cape Air (800) 227-3247. We will meet planes on request. Dickinson and Williston also offer air service.

ACCOMMODATIONS

Sidney:

Wyndham	(406) 433-3100

VIDEOS OF SALE LOTS

Video of sale bulls and heifers will be available to view on our websites, www.lelandredangus.com and www.koesterredangus.com, a couple weeks prior to the sale. All cattle will be penned by sale order to view sale day and will sell via video display.

ONLINE CATALOG & SORTABLE DATA

www.lelandredangus.com • www.koesterredangus.com
Download the BullPEN app on your mobile device to sort for specific criteria.

TELEPHONE BIDS

Bids will be handled in strict confidence by any of the publication representatives or the ranch. Capabilities to bid by phone on sale day are limited. To do so, please make prior arrangements with a livestock press representative or call the ranch directly at 701-565-2347. Bidders may also log on to DVAuction.com to bid online. Please see additional information on page 1.

HEALTH

All the bulls will have a general health and fertility examination prior to delivery and will be cleared for interstate transportation. Scrotal measurements will be available on sale day. All bulls are 50K DNA tested. All heifers are Bangs vaccinated.

FERTILITY

Yearling and 18-month-old bulls will have a breeding soundness evaluation and semen test prior to delivery. Yearling heifers are guaranteed open and breedable.

GUARANTEE

The bulls and heifers are fully guaranteed. Concerns are handled on a case-by-case scenario. We do encourage you to purchase livestock insurance. For more information on these affordable options, see page 6. All cattle will be sold according to the terms and conditions recommended by the Red Angus Association of America.

DELIVERY

Free delivery of bulls to central points up to 500 miles. Balance at cost. Heifers are the responsibility of the buyer. We will cooperate in any way to assist in deliveries of greater distance or by private arrangements and volume purchases.

LIABILITY DISCLAIMER

All persons attending the sale, any sale functions or viewing the cattle do so at their own risk. Leland Red Angus, Koester Red Angus, their staff or representatives assume no liability, legal or otherwise, for any accidents or injuries that may occur.

BULL MORTALITY INSURANCE

Purchases are the responsibility of the new owner. We strongly encourage you to insure your bulls. Coverage is affordable and a good business practice.

Ask for specific details at the clerking desk or contact Jeff Thomas.

SCROTAL CIRCUMFERENCES MEASUREMENTS & FERTILITY

All bulls will have a breeding soundness evaluation and semen test before delivery.

Scrotal measurements are taken at 10½ to 11 months of age and adjusted to 365 days of age. Scrotal measurements will be available sale day.

RED ANGUS AVERAGE EPDS AND RANGES

Average EPDs are printed at the bottom of each page and EPD breed ranks are included on the reference sires and each bull lot for easy comparison.

A-BAG-A-BULL

If you purchase a bull from us, we will provide a credit of one bag of FCCP or AA tag, OR \$25 towards EID tags per bull purchased. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

RedAngus.org
940-477-4593

RED ANGUS
RANCH TESTED. RANCHER TRUSTED.

CARCASS ULTRASOUND

This is the 24th year we have used ultrasound technology to evaluate carcass characteristics. Weather permitting, we will have carcass ultrasound information available on all bulls just prior to the sale that can be accessed on our web site.

This information will be available for our customers upon request and more importantly it will be used for more meaningful genetic evaluations in the future as it contributes to carcass EPDs.

RETAINED INTEREST

One-half semen interest is retained and full possession selling on all bulls. This means purchaser buys the bull for what he bids and gets 100% possession and 100% resale value of the bull when he sells him. It does give Leland Red Angus and Koester Red Angus the option to collect, use and market semen from the bull and does not restrict purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Leland Red Angus or Koester Red Angus and at the purchaser's convenience. Leland Red Angus or Koester Red Angus would assume full liability for the bull's welfare at the purchase value during transportation and collection unless it is a joint venture with the purchaser. In such a case, liability would be proportionately assumed.

PREMIUM CALF VALUE

Easy as 1-2-3

Want MORE for your steers?

THAT'S EASY ...

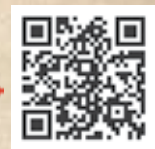

1. Purchase Top Dollar Angus-qualified bulls.
2. Raise Top Dollar Angus-qualified feeder calves.
3. Pocket MORE per head!

THE RESULTS: Better performance and a documented \$118.75-per-head advantage as fed cattle!

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB.... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

BULL & HEIFER DEVELOPMENT

LELAND BULL DEVELOPMENT

Our bulls are developed at our ranch facilities on a total mixed ration formulated for adequate growth, but mild enough to protect their fertility and longevity. Bulls are started on a roughage-only diet and gradually transitioned to a low mega-cal ration that never exceeds 48 mega-cals.

LELAND HEIFER DEVELOPMENT

The heifers are wintered on a roughage-only ration to restrict the ADG to no more than 1.5 lbs per day which is optimal for breeding performance.

KOESTER BULL DEVELOPMENT

The fall-born bulls are weaned in March and put on a high-roughage ration until we have green grass – hopefully in late May. The bulls summer on grass and limited supplement to encourage slow but steady growth for optimum longevity and fertility.

In September, we bring the bulls into the lot and put them on a 48 mega-cal ration consisting of chopped hay, sorghum-sudan haylage, cracked corn. The bulls stay on this ration until sale time.

We strive to promote steady growth, sound foot development and healthy, active potency so they are prolific breeders and maintain their body condition throughout breeding season.

UDDER SCORES

Udder scores have been used to cull and select cattle at Leland Red Angus and Koester Red Angus for many years.

Scores are taken within 12 hours of calving by the same person to insure consistency. Scores less than 5 are considered unacceptable, and those individuals are not kept in our herds.

We include the dam's udder scores for Suspension and Teat Size following her MPPA in each bull's data block.

Udder Suspension			Teat Size		
Score	Description	Example	Score	Description	Example
9	Very Tight		9	Very small	
7	Tight		7	Small	
5	Intermediate/moderate		5	Intermediate/moderate	
3	Pendulous		3	Large	
1	Very pendulous, broken floor		1	Very large, balloon-shaped	

GENOMICALLY ENHANCED EPDS

All sale bulls have been DNA profiled through GeneSeek's GGP-uLD test.

This ensures our customers have the most accurate information available to make their purchasing decisions. With the GGP-uLD profile, the bulls' EPDs now have the same accuracy as they would with their first calf crop reported and registered through the Red Angus Association of America.

The GGP-uLD test also verifies parentage so you are assured of the bloodlines you are buying.

We trust in the science behind the genomics and are committed to ensure more value in your purchases, increasing the profitability of your calf crop.

For those who would like to gain even more genetic knowledge of your cowherd, consider testing your replacement heifers with Igenity Beef®. Please contact RAAA for more information.

- EPD percentile rankings for all traits
- Sire verification (if sire is DNA profiled)
- Follow-up from RAAA Marketing Team Member
- Potential qualification tool into Top Dollar Angus

Identify your top replacements before breeding!

A **BIEBER CL ENERGIZE F121**
#3958815 • 1/12/18 • 100% 1A

Energize has a dynamic phenotype complimented with across-the-board calving ease, growth, maternal and carcass EPDs. Structurally correct with an excellent foot. Sons like Jump Start J137 have been very popular.

ProS	HB	GM	CED	BW	WW	YW	ADG	M	HPG	CEM	ST	MARB	YG	CW	REA

- We struggled to put Lot 1 and Lot 2 in the sale because they are the type of bulls we like to retain for our own use. 
- It's a repeat of 2023 when Lot 1 and 2 were also Propulsion and Shula sons – great bulls both years.
- Wrapped in dark cherry red hides, these bulls both have excellent foot structure.
- Long, smooth and thick with an attractive design.

Lot 30, LELAND PEERLESS 3220

- The first sale bull out of this hybrid cow and he is just as good as his numbers show!
- Indexing strong he ranks high for WW, YW, Milk, Marb and REA with a top 1/3 breed rank for HPG.
- Maternal sisters have all been retained as replacements.
- He is out of the same cow family that produced Lot 17.

By Design...

The second set
of age-advantaged bulls begins
on page 50 with Lot 111.

The third set begins on
page 67 with Lot 175.

Our fall-calving program is by design. Our cattle are bred, born and raised to excel in conditions opposite of most production seasons. They are tough, resilient and prolific. Sure, calving in August might be easier than March, however maternal and actual performance in the winter are antagonistic to nature and we identify and eliminate those unworthy of staying in our herd.

Conformation, muscle, foot structure, disposition, performance and maternal strengths are backed by breed-leading EPDs for growth and carcass. At the end of the day, our customers need cows that do their job, payweight at weaning and carcass traits that build a reputation with their feeders.

We are raising beef ... by design.

Winter breeding poses extra challenges for our fall herd. Our cows must breed during blizzards, long frigid spells and naturally shorter daylight hours. Likewise, the calves must grow during these conditions and wean in March. We have a zero-tolerance policy and sell open cows in the spring.

Each calf is tagged and weighed at birth. We also score the dam on her udder suspension and teat size, and record her disposition while processing her calf.

Our Fall-Calving Program

We designed our fall-calving program in order to offer our customers the option of bulls with an age advantage. Those few extra months of maturity don't necessarily mean the bulls will cover more cows, but they will maintain their body condition and come in after breeding season in good rig.

We summer the fall bulls on pasture with minimal supplementation, diligently culling for performance, foot structure and disposition. We move them into the lot in September and prepare them for carcass ultrasounding. The bulls are not tested for gain due to the hot summer months, but are developed for longevity and soundness.

We calve the cows and first-calf heifers in the pasture starting in mid-August. We synchronize and AI in mid-November, and pull bulls on New Year's Day. The calves endure the harsh winter conditions and temperatures during their pre-weaning age.

A Note About Performance Data

As many of you are aware that have used our fall-born bulls, they out-perform their actual weaning and yearling performance numbers. We want you to note that this year's crop of bulls have even more reduced actual performance numbers because of the winter they went through. Shoot, we were happy they had a heartbeat come spring. They were truly survivors!

The winter of 2022-2023 created a blizzard per week, brutal cold temps and relentless winds – all which came early and stayed late. Six months of horrific winter took its toll on the cows and their calves. Once warm weather arrived and we were able to wean, the bulls' genetics took over and they grew into an exceptional set of breeding stock. We believe the best way to measure an animal's true performance is with environmental factors removed. EPDs and breed percent ranking do a very nice job of removing that noise, which reveals an animal's true performance potential.

Second draft of age-advantaged bulls starts on page 50 with Lot 111.

Lot 51, LELAND FULL HOUSE 0265-3320

- His 11 YO dam has a superior record with 5 previous bulls selling from \$7,500 to \$13,000.
- Look at the top of breed indices, WW, YW, Milk, Stay, Marb and REA!!
- A cow bull that really turns the crank from an old cow with excellent foot and udder scores.
- His dam produced 10 high performance calves, 9 of which were first cycle conceptions.
- This bull leads off the next 60 lots of yearling bulls, but he could easily have been in the very first pen.

- His dam is a beautiful uddered Lotto 722 daughter with nice growth numbers, Milk, fert, and CEM.
- A 748# WW and 1356# YW Fusion 5202 maternal brother sold last year to Bob Schettler (ND).

Lot 91, LELAND HIGH ROLLER 3292

- Raised by a 10 YO cow who has had 5 sale bulls, selling to repeat customers like Wagonhound (WY), Bickel (SD), Ben Murphy (ND), Craig Fisketjon (ND) and Mike Kelley (ND).
- This bull is stacked with older genetics which have stood the test of time.

- A calving ease heifer bull out of a Leland Marksman daughter, a Genex calving ease sire.
- Sired by Peerless 9976, who also adds calving ease with growth, Milk and REA.
- This bull will work on both heifers and cows.

Lot 96, LELAND DISRUPTER 3264

- This bull is from the same cow family as Lots 61 and 88.
- It's not surprising he stands out for breed rank across the board.
- He covers every base with calving ease, Milk, HPG, Stay and carcass posting top indexes.

- A Fusion 5202 son out of a young Rollin Deep daughter.
- MGD has excellent production records, raising 3 bulls, all selling significantly above average.
- His MGD has a high performance Stockmarket brother, Lot 4.

- Although a son of Fusion 5202, we recommend this bull for mature cows only.
- His pedigree is loaded with thickness, high performance, BW sires like Full Count 1830Y and Leland Right Direction 8242.
- His indexes suggest ProS and HB with Milk, fertility, Stay and carcass power for productive progeny.

- A strong carcass bull ranking high for Marb and REA.
- His dam has excellent foot and udder scores.
- This is the second youngest bull in the sale but we expect him to excel as he gets older.

Lot 157, LELAND STOCKMARKET 30J-3183

- He is typical of the Stockmarket 30J calves – rapid ADG and heavy WW and YW.
- High breed ranks for indices, WW, YW, Milk, HPG, Stay and Marb.
- His high ADG and dam's 105 MPPA should translate to power performance.
- Notice his dam is just a first-calf heifer.

- A rapid gaining, high carcass bull out of a Brunswick D202 first-calf heifer.
- His MGD produced Lot 12 this year.

LELAND RIGHT GUN 4597, MGD to Lot 170

- A heifer bull deluxe with heifer bulls Charter 0906 and Spartacus G06 both in his pedigree.
- His MGD has a 74 lb. BW avg. on 8 head.
- High performance from low BW genetics is not expected; however, this bull is still ranked in the top 20% of the breed for those traits.

- Finishing the sale with another heifer bull deluxe – long, deep-sided, cow-maker bull.
- Exceptional breed rankings across the suite of EPDs and indexes.
- Expert low birth, good growth, carcass and stayability.
- **Feb. 10th Wt: 1468 • Feb. 10th Scrotal: 41.0**

- 30 commercial open yearling heifers will sell by auction.
- They will sell in minimum groups of 5, with buyer's option to take as many groups as available, by gate cut.
- These heifers all qualify for registration at \$100/head above sale price.
- Heifers will be kept and fed until March 17, 2024.
- This year we decided to leave the heifers in their work clothes. These are the same quality heifers raised here on the ranch that you have seen come through the sale every year. Past sale heifers are proven producers.

Foot and Leg Scoring Reference

CLAW SHAPE Reference: Shape (primarily curl) and unevenness of the claw set.

1 Open Divergent

5 Desirable

9 Scissor Claws

FOOT ANGLE Reference: Strength of pastern, depth of heel and length of foot.

1 Steep Feet Angle

5 Desirable

9 Shallow Feet Angle

REAR LEG SIDE VIEW Reference: Angle measured at the front of the hock.

1 Straight Rear Leg

5 Desirable

9 Sickle Hocked Rear Leg
