## Welcome to NJW!

Our program and these bulls are the result of a passion and commitment to raising the most predictable, highest quality Herefords possible. We have developed these genetics by using bloodlines that fit our environment, selecting for balanced traits and culling! Buying bulls is a huge investment with the genetics you choose today having tremendous long-term impact on your herd. This year, in an attempt to offer you the most predictable, accurate EPDs as possible, we Genetically Enhanced each bull's EPDs (as noted by the GE-EPD symbol next to each pedigree). We believe the bulls in this sale are a forward moving set of "Genetic Tools" both to look at and on paper. The average EPDs of NJW Yearling Bulls are...

BW	WW	YW	MILK	M&G	SC	REA	MARB	CHB
<b>2.1</b>	<b>51</b>	<b>84</b>	<b>29</b>	<b>55</b>	<b>1.1</b>	<b>.56</b>	<b>.15</b>	<b>\$27</b>

While the Hereford Breed averages are:  
**3.3** **48** **78** **20** **44** **0.8** **.31** **.09** **\$23**

These bulls were raised on Wyoming Range and their Mother's Milk only ...no creep! They posted an Actual avg. BW 84 lbs. (scale weighed). We develop our bulls to improve longevity and winter them here at the ranch on a limited amount of 15% grower pellet and free choice grass hay.

8Y, 10Y, Trust, Beef, 44U and 88X continue to consistently sire the kind we want to produce ...easy doing, big bodied, thick and sound cattle with added performance, yet still maintain enough calving ease and high maternal traits. These herd sires are high accuracy Hereford Trait Leaders ...their influence is strong throughout this catalog and can be used with confidence! Our herd is very maternal and we demand our cows have good udders, are great mothers and calves be vigorous at birth! We breed our heifers to calving ease sires and this year have a very strong group of low birth bulls we recommend for heifers.

Scan data did not make the catalog, but is available online and on sale day. As you look at the dam pictures, keep in mind most were taken at Summer's end a few days prior to weaning.

If you have questions or can not be here for the sale, Ned and I are happy to help with selecting bulls to fit your program. Our bulls and cowherd are here at the Ranch and available to look at anytime. If you are coming in on the 28th, we will have supper (at dark) here at the Ranch and would love to have you join us!

**— Ned, Jan, Bell Ward**

## GENERAL INFORMATION

### Sale Location:

Sale located at Ward Ranch ...2.5 miles North of Sheridan, WY ...off I-90 Exit 20, turn right on Hwy. 338 for 2.5 miles to the ranch on the right.

### Airports:

Billings, MT ...125 miles from the ranch; Sheridan, WY for private planes and served by Charter Alliance Group, go to: [FlySheridan.com](http://FlySheridan.com).

### Motels: Sheridan, WY ...ask for NJW Bull Sale Rate

Historic Sheridan Inn • 307-674-2178

Holiday Inn • 307-672-8931

Best Western Sheridan Center • 307/674-7421

Hampton • 307-673-2734

**Terms:** Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until settlement has been made. Each animal becomes the property of the buyer immediately after the animal is sold. Any death or injury thereafter falls upon the buyer. **Announcements concerning the cattle at the sale ring by the owners or the auctioneer will take precedence over statements in this catalog.** All persons attending the sale do so at their own risk. Neither the owners, nor any person associated with the sale, assumes any liability, legal or otherwise.

**Guarantee:** All animals in the sale are guaranteed breeders. If any adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit will be given on the purchase of another animal.

**Health:** All sale bulls have passed a Breeding Soundness Exam. They have been BVD ear notched and tested negative. **Health certificates will be furnished for shipment anywhere in the U.S. Since each State has different regulations on bulls coming from Wyoming, not all bulls will be able to get a Health Permit to go to every State on sale day!**

All sale bulls have received a pre-breeding booster of Bova-Shield Gold FP L5 HB, a dose of Vibrin and a booster of our Autogenous Pinkeye / Footrot Vaccine as well as poured with Dectomax.

Bulls that have it noted on their catalog page have been DNA tested through the American Hereford Association and are free of all known defects recognized by the AHA as of March 29, 2016 and have had percentage verified and been GE-EPD tested.

**Delivery:** Free delivery within 300 miles. Receive a \$50 discount per bull that you haul home on sale day.

### Take Note:

- Each bull's Lot # is same as his ID #.
- Bulls sell in catalog order unless changes announced Sale Day
- All sale bull photos are untouched.
- **Actual Scrotal Measurements were taken Jan. 20, 2016.**
- The CSC Prefix bulls are owned by Cody & Shawna Chabot and are managed as part of our program.
- In case of inclement weather, please call or refer to website for any changes.

Catalog Prepared by: Lezlie Moore, Vivian, SD • 605/683-4800

Catalog printed by: Wes and Andie Fishel-Carpenter (Alphagraphics, Winston Salem, NC) • 336/403-7627

**NJW P606 72N DAYDREAM 73S** ...the dam of Trust, 8Y, 10Y and numerous other herd bulls. She is in the pedigree of 75% of this year's sale bulls!

*In an effort to improve the accuracy of their EPDs, every sale bull has had theirs Genetically Enhanced as indicated by the GE-EPD logo. Each bull has also been DNA tested for parentage and known defects.*

#### **Genomic Enhanced EPD**

Over the past few years, the American Hereford Association has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into National Cattle Evaluation (NCE) to enhance the predictive power of EPDs. Genomic Enhanced EPD (GE-EPD) allows commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information of Hereford Genetics. The AHA utilizes a 77K, High Density (HD) panel that was built off of high accuracy Hereford sires. Each animal that is tested has an updated set of EPDs and corresponding accuracy. For some traits, the added accuracy will increase by 100%, and moving from .15 to over .30 means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed. Using this information reduces your risk when buying, and helps to plan matings based off of all information available.

---

Hubbard is proud to provide nutrition for Ned and Jan Ward's developing program for the past several years. The pelleted 15% protein ration is made from all natural products. Their ration is customized to provide moderate growth and conditioning while maintaining soundness. **For more information on a program customized for you, call 605-342-6172.**

**HUBBARD FEEDS INC.**

# EPDs

EPD's are an estimate of an animal's genetic worth for that particular trait. An EPD is expressed in the units of measure for that trait. EPD's are based on a combination of performance information from an animal's pedigree, individual and progeny performance. EPD's can be used to predict one animal's progeny performance compared to another's progeny.

**EPDs are commonly used by cow/calf operators to select herd sires** either to buy semen for artificial insemination or bulls to breed cows naturally. Even though EPDs are an accepted herd sire purchasing tool, their definitions, correct use and significance are not always clearly understood. To be reliable, EPDs should be compared between animals of the same breed. In other words, EPDs do not provide accurate comparisons between an Angus and Hereford bull.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit BW to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Maternal Milk EPD (MM)** The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability.

**M&G, (Milk and Growth):** This is a measure of a sire's ability to pass on milk production and growth rate through his daughters. It predicts the total weaning (direct and maternal) that will be displayed in his daughters' offspring. It is calculated by adding half of the Weaning Wt. EPD with the Milk EPD ( $[1/2 \text{ WW EPD}] + \text{ M EPD}$ ).

**Scrotal Circumference EPD (SC)**, is expressed in centimeters and predicts differences that will be passed on to progeny. Bulls with larger scrotal circumference EPDs are expected to sire dgtrs. that reach puberty earlier and have earlier calving dates.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**Baldie Maternal Index (BMIS)** BMIS is a maternally focused index that has a production system based on 1,000 Hereford x Angus females with a progeny harvest endpoint directed toward Certified Hereford Beef (CHB). This index is more critical of CE than the Brahman Influence Index (BII\$) with significant weight on fertility. There is positive weight on WW and a slightly negative weight on YW, which promotes early growth and then a slow down on growth to keep mature size manageable. The emphasis of IMF is greater than the emphasis of REA. This is true because of the price difference of the Choice-Select spread and the fact that there is very little incentive to produce cattle better than a Yield Grade 3. This index is geared to service any commercial program that has British-cross cows.

## **Calving Ease Index (CEZ\$)**

This is a general purpose index that focuses on identifying bulls that can be used on heifers and then ultimately the calves will be marketed through the CHB program. As you might expect, CE and MCE carry significant weight in this index along with fertility. Very little weight is put on growth traits and less emphasis on carcass. Remember, this is a general index specifically designed to be used in a heifer program.

## **Certified Hereford Beef Index (CHB\$)**

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW.

• Retaining  
an interest.

• Herd bull style and presence! 49C came with a moderate birth weight and has continued to impress us with his performance, incredible thickness, width of top, huge stifle, big hip and length of body. We love his dam, her phenotype, her udder and ability to raise the best! His sire is a performance bull that is backed by a workhorse of a cow, 67U. One of my favorites and only sells because he is horned.

• A standout brother sells as Lot 57C.

• Collected and sells with 50 Units Semen.

**• Retaining  
an interest.**

• This elite herd bull prospect comes as close to having it all as any in the offering. He is outstanding genetically, phenotypically and on paper. He's **HOMOZYGOUS POLLED** with a good, low birth weight and BW EPDs, definitely a bull we would use on heifers! A bull that's extremely balanced, deep flanked and deep muscled with a big, square back end and quarter. Pre-scan GE-EPDs put him at .41 MARB which ranks him in the breed's Top 1% where he also sits for MILK and Scrotal. A standout 10Y son out of a near perfect uddered Beef daughter.

• Ranks in Breed's Top 1% for MILK, SC, MARB; Top 5% for BW, M&G, BMI; Top 10% for CED and CHB.

• **HOMOZYGOUS POLLED** and a top heifer bull candidate! He's short marked, well pigmented and put together for calving ease, yet has some shape and muscle. Double-bred Spirit Queen cow family so expect excellent udders on his females. Three other calving ease full brothers sell as Lots 169C, 179C and 193C.

• Ranks in Breed's Top 10% for Teats and Udders.

• 8Y has a "signature stamp" he applies to all his bull calves! 190C started out small at birth, but has always shown extra muscle and shape, and has now developed into a powerful yearling. He is medium framed, but it would be hard to find a bull with more muscle and power. Dam is a top uddered and easy doing.

• **HETEROZYGOUS POLLED** and one of four calving ease brothers out of a tight and tidy uddered, high milking Trust daughter and proven low birth weight herd sire 174X. Like his brothers, 193C has a nice, small head and smooth shoulders, but offers a bit more length of body and more muscle expression with a big, more square hip and strong weaning and yearling weights.

• Ranks in Breed's Top 10% for MILK and Udder Score.

## HEREFORDS FOR TODAY'S CATTLEMEN

It is our firm belief, when Breeding Cattle, the "Balanced Trait Approach" is the right one! We want as much performance as we can get while maintaining that "Critical Balance" of calving ease, cowherd and feedlot efficiency and proven carcass value. All the while, never forgetting the "Unmeasured Traits" of structural soundness, udder quality and attachment, mothering ability, strong vigor at birth, disposition, fertility and longevity.

**NJW Bulls**  
...Honest, Efficient, Predictable!
