Sale cattle videos available at:
NJWHerefords.com

Welcome to NJW!

Our program and these cattle are the result of a passion and commitment to raising the most predictable, highest quality Herefords possible. We have developed these genetics by using bloodlines that fit our environment, selecting for balanced traits and culling! Buying bulls is a huge investment ...the genetics you choose today having tremendous long-term impact on your herd. Buying the RIGHT bull can transform your calves and their value in just one generation as well as affect your cowherd for the next 10 years. Again this year, in an attempt to offer you the most predictable, accurate EPDs, we have Genetically Enhanced each animal's EPDs. We believe these cattle are a forward moving set of "Genetic Tools" both to look at and on paper.

The average EPDs of all this year's sale bulls are:

CED	BW	WW	YW	MILK	M&G	SC	Udder	Teat	REA	MB	\$CHB
5.6	2.0	62	98	34	65	1.3	1.40	1.40	.61	.15	120

This year's sale heifers:

7.2	1.5	60	96	33	61	1.4	1.40	1.40	.58	.06	120
-----	-----	----	----	----	----	-----	------	------	-----	-----	-----

Breed averages:

3.3	2.7	55	88	26	54	1.0	1.30	1.30	.19	.14	104
-----	-----	----	----	----	----	-----	------	------	-----	-----	-----

These cattle were raised on Northern Wyoming and Southern Montana Range and their Mother's Milk only ...no creep! The average actual BW on all sale bulls is 86 lbs. The average actual BW on all sale heifers is 80 lbs. We develop our bulls to improve longevity and winter them here at the ranch on a limited amount of 15% grower and free choice grass hay.

Our goal is to produce easy doing, big bodied, thick and sound cattle with added performance that still maintain enough calving ease and high maternal traits. Our herd is very maternal and we demand our cows have good udders, are great mothers and calves be vigorous at birth! We expect our two yr. olds to raise bull calves to sell in the sale.

We make a special effort to get pictures of all sale bull dams, but keep in mind that most pictures were taken at Summer's end, a few days prior to weaning.

If you have questions or can't attend the sale, Ned and I are happy to help with selecting bulls to fit your program. The cow herd is located at our North Ranch and Bulls and Sale Heifers are at the South Ranch. Ranches are about 20 miles apart so allow extra time if you want to see both. If you are coming in on the 26th, please plan to join us for Supper at the South Ranch sale location!

Many Thanks! Ned & Jan Ward

AHA GE-EPD

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

**All NJW Sale Cattle
Are Tested!**

GENERAL INFORMATION

Sale Location: NJW South Ranch, 888 Lower Prairie Dog Rd., Sheridan, WY ...off I-90 at Sheridan, WY take Exit 23, go East on Hwy. 336 for 3.5 miles, turn left on to Lower Prairie Dog Rd., drive 9 miles to sale barn on your left. **Set your GPS when you turn on Hwy. 336 as it will take you on best route!**

Airports: Sheridan, WY for private planes and served by United Airlines or Billings, MT...145 miles from the ranch.

Motels: Sheridan, WY

Comfort Inn (located on hwy. to Ranch) 307/ 675-1101

...Ask for NJW Bull Sale Rate \$104

Nelson Inn, 307/ 742-7637 (Airbnb, real nice)

...NJW Bull Sale Rate \$125

Hampton, 307/ 673-2734

Terms: Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until settlement has been made. Each animal becomes the property of the buyer immediately after the animal is sold. Any death or injury thereafter falls upon the buyer. **Announcements concerning the cattle at the sale ring by the owners or the auctioneer take precedence over statements in this catalog.** All persons attending the sale do so at their own risk. Neither the owners, nor any person associated with the sale, assumes any liability, legal or otherwise.

Guarantee: We guarantee all livestock sold as sound breeders. If an animal fails to breed, it must be reported to NJW or returned in good condition and in compliance with the Wyoming Health Regulations. If an adjustment is required, it will be made with a replacement animal of equal value (or) credit of another animal of equal value in our NEXT sale. No adjustments will be made after nine (9) months.

Health: All sale bulls have passed a Breeding Soundness Exam. Please note that breeding soundness examinations are an indication of semen quality and reproductive health of the bull at the time of examination, not of their future fertility. Many factors including health, weather and nutrition will impact semen quality. We recommend that another breeding soundness exam be performed prior to use. All sale animals have been BVD ear notched and tested negative. **Health certificates will be furnished for shipment anywhere in the U.S. Since each State has different regulations on bulls coming from Wyoming, not all bulls will be able to get a Health Permit to go to every State on sale day!**

All NJW Sale Bulls have received a pre-breeding booster of Triangle 5, Citadel VL5, a Pinkeye/Footrot vaccine and poured with Cylence.

All NJW Sale Heifers have received a pre-breeding booster of Express FP5 VL5, Pinkeye/Footrot vaccine and poured with Ivomec.

All NJW sale bulls and heifers have been DNA tested through the American Hereford Association and have been parentage verified and GE-EPD evaluated. All potential MD and DB carriers have been tested and results noted in the sale catalog under their names or if noted as DBP tests were not complete at catalog press time and results will be noted on the sale day supplement sheet.

Delivery: Free delivery on Bulls and Heifers within 400 miles; balance at cost. Receive a \$50 discount per Bull or Registered Heifer you haul on sale day. We'll assist you with long distance delivery to be done as soon as possible after the sale.

GENETIC DEFECTS: If any 2024 sale animal is a carrier of a known genetic defect as of sale day (3-27-2024), it will be noted in the catalog footnotes below the animal's name. Potential carriers will be noted as well. The sale supplement sheet will verify any changes to the catalog.

• EPDs are current as of Feb. 15, 2024.

Take Note:

- Each animal's Lot # is same as his ID #.
- All cattle photos are untouched.
- In case of bad weather, please call or refer to website for any sale changes.

■ An upstanding, "Always Looks Good" kind of bull with solid upper-end data! He's a calving-ease bull with extra muscle, growth, power and is exceptionally sound and good footed, plus has his sire's "signature" big hip and depth of body. Progeny are low birth and uniform with ultimate calving ease. A son, 94L, is our 2024 standout heifer bull. Dam is turning into a powerful bull producer and we will be using another son in our program.

■ **TERMS:** Select Sires has his semen rights leased, so terms will be: **Full Possession Only** with the buyer taking possession sale day. However, buyer agrees to make 216J available to Select Sires for collection (at buyer's convenience, between breeding seasons) if Select Sires should ever need to collect him again.

■ **Sells with 100 units of "In-Herd Use Only Semen" which is located at World West Sire Services.**

■ **SELLING FULL POSSESSION ONLY!**

■ I really like this low birth, complete bull. Big topped and full of meat with extra look and muscle, he has the right pigment and color, plus he's super sound moving. Use on your heifers, then turn him with cows. All cows in his pedigree have exceptional udders with very small teats, including his two-year-old dam.

Sire CRR 971 Levitate 142

Paternal Granddam 8124

Dam 119E

■ Once you see this Herd Builder you won't forget him ...he's the fault-free kind that never has a bad day! Wide based, deep end to end, powerful and easy doing with a big square hip, stifle and loads of muscle. Free moving, very good footed and is **Homozygous Polled**. This is a bull to walk the pasture or show ring.

■ Top producing dam 119E is also the mother to our Endorsement 216J bull we own with Select Sires. We used his sire CRR 142 to bring in some elite, powerful, high maternal genetics to our program.

■ **Terms available sale day.**

■ A bull I really like for all he is ...easy doing, big bodied and as soggy as they come! He is long sided, super wide, square hipped and so much like our Homegrown 8Y bull was, both in looks and quiet disposition. We are super impressed with the growth and performance in these 142 sons and after seeing the cows behind him, we're looking forward to the daughters in production. Dam 300G is a super producer that outbreeds herself.

THE NJW HEIFERS

We believe the cowherd is where it all begins! Our herd is a cumulation of cows and cow families that are based on stacking genetics that will, in turn, produce consistent, efficient, high income producing offspring.

We are again offering a sampling of our genetics with a group of NJW registered replacement Yearlings. We tried to share a heifer from each of our ET matings and from a number of cow families.

Dam 129E

Granddam 12A

■ **A heifer to do it all** ...the kind you would like no matter the breed or color. My kind of show heifer ...exceptionally long, big bodied and wide pinned with a big square hip and good back leg. I like them broody and soft made with a little throat so easy doing, yet they have to be feminine. She and her dam are this year's cover shot. Dam and granddam have IDEAL udders. Sire is the low birth, high performing kind. **Retaining 1 future flush at buyer's convenience.**

Dam 894

NJW FALL BRED HEIFERS

These Fall Bred Heifers are mostly the product of embryos that we plant for Fall calving and are the group in its entirety. They are mostly out of 79Z, dam of sires Endure, Mighty, Heavy Duty and Bourbon as well as numerous other herd bulls across the country. It will be one of your last chances to buy an own daughter of 79Z from us!

Their breeding information will be available closer to sale day. They will be bred to either K016 or 10H ...their information is to the right.

■ One of the deepest, biggest bodied, thickest Herd Bulls we've ever raised and used. He is super easy fleshing, super sound and free moving. A bull that always looks good no matter the pasture conditions or if at end of breeding season. Daughters are beautiful, productive brood cows and sons are high weaning, big yearling performers. Dam 76S was one of our best and known for her great udder. She is in a high percentage of our cowherd pedigrees and is dam to herd bulls Beef 38W and Salute 201C with numerous other sons working around the country.

■ Semen: \$25/Unit • Certificate: \$75

■ An outstanding herd builder and Hereford 10-Trait Leader! Used successfully on heifers and cows. Average BW 85 lbs. on four NJW crops. 81E has left us tremendous young cows with nice udders and plenty of milk ...the kind to anchor your program! Sons are equally as good with three NJW crops averaging \$9909 in our sales.

■ Semen sold by Select Sires.
