Welcome to our 60th Annual Bull and Female Sale

Every year is different from the last. Our spring and early summer was extremely dry and our cow herd was in danger of major reduction. Rains came too late for summer pastures but in time for the fall cover crops the boys planted. The cattle did well on the dry pastures and then got another boost in the fall from lush fall cover crops. The calves, cows and herd bulls went into winter with heavier weights than normal.

Time sure flies. Below is Shannon and Sue and some of their family ten years ago. Today half of them are out of college and have jobs. They represent the fourth generation to ride the pastures. They still come home on days off and assist in the trail drives.

The animals in this year's offering again show an increase in calving ease, growth and carcass traits. We manage for these traits. **Birth weight** and **growth** are **antagonistic** to each other. Through intense selection over the years, we have been able to move the herd to the top 1/3 of the breed for calving ease, the top 5% for weaning weight and the top 10% for feedlot and carcass traits.

We hope time will allow you to attend the sale in person on Presidents' Day. If not, you can participate on the internet. Feel free to call us for descriptions of the animals. We look forward to meeting new friends and learning from our current customers as to how their purchases have performed for them.

Profit Indexes Pay for the Ranch

- Individual EPDs are the best tool to improve an individual trait.
- Profit Indexes combine weighted EPD traits to predict Profit.
- Poultry, Swine and Dairy industries have used Profit indexes for decades.
 - The Beef industry started using Profit Indexes this decade.
 - Profit Indexes are the best tool in selecting breeding stock.
 - Use CEZ when selecting a Heifer Bull!!
- Antagonist traits can cause problems when selecting for one trait at a time.

Our hats are off to Art and Jean Linton

Art and Jean just retired after a life time of raising a great family and contributing immensely to the beef industry. After graduating from college Art served on the staff of the American Hereford Association for a few years. He then went into ag education at various Universities.

Upon retiring from the ag education field, Art and Jean purchased an attractive ranch in Nebraska. It was there that they expanded their Registered Polled Hereford herd. Art was a devout performance breeder and contributed immensely to the Hereford breed by raising several Herd bulls used by breeders.

Art and Jean recently dispersed their herd and moved to Virginia where some of their children and grandchildren reside. We are especially appreciative of their ability to raise herd bulls such as **HYALITE ON TARGET 936** and several of his brothers. They have contributed as much improvement to our herd as any bloodline we have. We also value their friendship and advice this past decade.

We wish you many healthy retirement years enjoying your family.

- Proud Packer of Certified Hereford Beef® for 18 Years
- Ten consecutive growth years in pounds sold and carcasses certified
- More pounds per capita of Hereford Beef is sold in this region (retail and restaurants) than anywhere else in the US. Go local.

The Best Hereford Beef Can Now Be Found Local

Each week, we buy corn fed finished cattle primarily in this region. However, we reach beyond the strike zone to find the best Herefords wherever they might be fed in the Midwest. Even after we've concluded our normal weekly trade, we are never too full for Herefords and Baldies. We are always in the market to buy finished Herefords and we offer a \$25 premium per head for Hereford program qualifiers. If you'd like your finished calves in our Hereford program, we can introduce you to partner feed yards who custom feed or who buy Hereford and Baldie calves. Whether you want to market your feeder calves or retain ownership, let us help you direct your load lot Hereford influenced feeder cattle into our primary trade area.
