Dear Cattle Producers,

We would like to invite you to join us for a noon lunch and 1 pm CST sale. The bulls have all been developed in the same pen. They compete individually for bunk space, bedding, and shelter. The On Feed Test starts the day they are weaned. Every bull and heifer in the sale was born and raised here at the ranch.

Single trait selection is not what we do. We try to provide you with the data I think is important when I select an AI sire or purchase a new herd sire. If you need any assistance with a sale animal, please give us a call and we can go out and put an eye on that animal to make sure it fits your needs and goals.

This real world approach, along with some harsh temperature swings, reveals the superior genetics and high quality cattle that will work for you.

If you are in the area before the sale, stop in and take a look at the cattle. Sale order and supplemental sheets will be online before the sale and in the barn the day of the sale. Please bring your catalogs along with to the sale. If you forget, we will have extra catalogs in the barn the day of the sale.

We look forward to seeing you and serving you in 2018 for all your cattle needs.

Sincerely,

Mark Baxter

Welcome to the Back to the Basics Sale!

We appreciate all of your inquiries, please feel free to stop by and inspect the cattle at any time.

We thank you for all of your past support and look forward to doing business with you in the future.

We believe crossbreeding is the key to success for the commercial cattleman. Mark and I strive to offer the type of cattle that produce results at home in the pasture, as well as in the sale barns and the finished product on the rail.

Again thank you for your interest. Please call with any questions.

Reese, Elly Jo, Weston, Jocelyn and Abby Wagner

Sale

Sale Terms & Conditions

TERMS

The terms of the sale are cash and all settlements must be made at the close of the auction. All cattle will sell according to the terms and conditions of their respective breed. Baxter Angus will retain 1/3 semen interest on all bulls sold.

GUARANTEE

Baxter Angus -

I guarantee that all breeding cattle sold are fertile to the best of my knowledge, both bulls and females. If a bull is injured at any time following the sale and during the first breeding season, he will be replaced or you can be issued credit equal to the purchase price minus the salvage value received for that bull. If a female would be determined to be a non-breeder, then we ask that you would sell her and accept the difference as credit. Credit does not expire. I would ask that you contact me before you cull your animal.

Wagner Herefords -

Your new bull will be guaranteed for his first 60 day breeding period. If he fails to breed the seller will provide a suitable replacement or credit buyer at next sale. We recommend that all bulls be semen tested prior to being turned out to pasture. Please contact seller before you cull your animal. Bred Heifers: All bred heifers are considered "safe with calf" day of sale, and will be considered a breeder, no further guarantees will apply.

ABSENTEE BIDDING

If you would like to place a bid but are unable to attend the sale, please direct your bid to any of the owners or sale staff. You may also bid online as the sale will be broadcast live on the Internet at www.thelivestocklink.com.

HERD HEALTH

Baxter Angus - All calves are vaccinated in the fall for IBR, BVD, PI3, 7way, one shot and poured. All the bulls have had one foot rot shot. All heifers in the sale have been Bangs vaccinated, preg checked open, and tested clean for BVD.

Wagner Herefords - All sale cattle are in excellent health and have been poured with Dectomax. Coming two year old bulls have been semen tested and scrotal measured. Bred Heifers have had all pre-breeding shots and two scour guard shots. If you have any health questions feel free to contact Dr. Gena Neu at Prairie View Vet Clinic 460-1654.

DELIVERY

We offer three options for our bull buyers:

1. Take your bull home sale day, save \$50 per bull.
2. Free delivery 200 miles from seller, and cooperate on further distances. We recommend insurance.
3. Seller will board your bull until April 15th. We recommend insurance.

All bred heifers to be taken home day of sale.

INSURANCE

Animals will be at the buyer's risk immediately following the sale and we strongly recommend purchasing insurance. More information will be available sale day.

Barb Lenocker, Heartland Financial Services, Inc.
605-450-8480

PERFORMANCE INFORMATION

EPDs in this catalog are the most current at the time of catalog printing. Please refer to the AHA and AAA for updated EPDs. All information is correct to the best of our knowledge. A supplement sheet will be provided sale day for ultrasound and carcass data.

ANNOUNCEMENTS

Announcements from the block will take precedence over the sale book.

Postponement Date is March 26, 2018.

EPD EXPLANATION PER THE AMERICAN ANGUS ASSOCIATION

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
