Wilken Angus

Wilken Angus

Sale Day & Time:
Friday, November 26, 2021 -- 1 p.m. MDT

Sale Loction & Directions:
Wilken Ranch, Meadow, SD
Directions from the south: 3 miles west of Faith turn north on highway 73. Go 21 miles north on highway 73. Turn west on Happy Hill Rd. Go 5 ½ miles west on Happy Hill Rd. to Wilken Rock. Turn south. Go ½ mile south.

Directions from north: Jct of Highways 73/20 with Indian Creek Church on the corner and Isabel to the east. Travel south 9 miles on highway 73 to Happy Hill Rd. Turn west on Happy Hill Rd. Go 5 ½ miles west on Happy Hill Rd. to Wilken Rock. Turn south. Go ½ mile south.

Sale Day Telephone:
Gary Wilken: 605-788-2855 (Home) | (605) 515-3786 (Cell)
Doug Dietterle: 605-580-1362

Auctioneer:
Doug Dietterle: 605-580-1362

Delivery & Wintering:
Wilken Angus will be delivering all bulls. We will deliver your bulls the week after the sale and you will receive a $400 discount. The second option would be free wintering and delivery the first part of April. Delivery is free within a 200 mile area.

Semen Testing and Ultrasound Data
The bulls have been fertility-tested by Dr. Bleaux Johnson of West River Vet Clinic and ultra-sounded by Dan Hines.

Guarantee:
Wilken Angus guarantees all bulls against any injury that would keep them from being a breeder for the first breeding season. If a problem occurs, return the bull and a full credit will be given towards next year's bull sale, or a suitable replacement will be provided if available. The buyer will choose the preferred option. All claims must be made by 10/15/2022.

Volume Discounts:
Buy three bulls- 3% discount; four bulls- 4%; 5 bulls- 5%; on up to a maximum of 10 bulls-10% discount.

Sale Day Reps:
Donnie Leddy, Cattle Business Weekly, 605-695-0113
Dan Piroutek, Tri-State Livestock News, 605-544-3316
Scott Dirk, Tri-State Livestock News, 605-380-6024
Mason Dietterle, 605-580-5878
Beau Ravellete, RPI Promotions, 605-685-8155

Lunch:
Complimentary lunch beginning at 11:00 AM.

Zoetis 50K Genetic Testing:
We are pleased again this year to have the Zoetis 50K testing. 50K testing uses a sample of each of our bull's DNA to dependably determine their genetic potential. The bulls selling have been sire verified through the 50K genetic testing.

See page 4 for more information on 50K genetic testing information provided.

Individual Docility Score:
We have instituted a docility score that is specific to our bulls. This is NOT AN MVP. It is a subjective score derived from our personal evaluation of each bull. A bull would have to be rated 1-3 in order to qualify for our sale.

1 - Extremely Gentle
2 - Docile
3 - Restless
4 - Flighty
5 - Agressive
6 - Very Agressive.

Our Vision:

We desire to equip our customers with the most profitable seed stock in the industry, through exclusive use of high accuracy AI genetics and rigorous culling of our cow herd. Our goals of consistent calving ease, maternal easy fleshing females, and moderate to high growth cattle with positive carcass qualities are in place to ultimately serve our customers with success through every cattle cycle.

Hello from Wilken Angus!

We are glad that you have this catalog in your hands and we are excited for you to take a look at the bulls. A big "Thank You" to our friends and customers for your continued support.

We are anxious to host our sale at the ranch again this year. The bulls will be penned around the barn in sire groups. The sale will be a video sale through The Livestock Link. About two weeks prior to the sale, there will be videos of each bull available on our website, www.wilkenangus.com.

In an effort to make sale day as simple and relaxing as possible, we will deliver all bulls; so there is no need to bring your trailers.
For the last 19 years all bulls kept or replacement heifers retained in the herd have been AI sired, conceived in the first cycle.

Our calves are weaned from October 20th to November 1st, then put on a grow ration to gain approximately 1.5 lbs. per day, and finally, turned out on grass for 90-120 days. The first week in September, the bulls are brought in they are put on a conservative grow ration allowing them to develop slowly. The bulls did come in lighter this September reflective of the dry and hot summer.

We strive to provide you with the tools needed to confidently evaluate the bulls. These tools include performance data, 50K testing, ultrasound data, and our own docility index, with the added confidence that all the bulls have been sire verified through SireTrace.

These bulls all sell as commercial bulls to the best commercial cattlemen in the world!

Our family looks forward to serving you on sale day. Have a great Thanksgiving with your family and we'll see you the day after.

Gary and Lori Wilken

Thus says the LORD: "Let not the wise man boast in his wisdom, let not the mighty man boast in his might, let not the rich man boast in his riches, but let him who boasts boast in this , that he understands and knows me, that I am the LORD who practices steadfast love, justice, and righteousness in the earth. For in these things I delight, declares the LORD."

Jeremiah 9:23-24

Bid Online!
If you are unable to attend the sale, you can register to watch or bid online through The Livestock Link by following these instructions:

The Livestock Link™
Livestock Videoing · Video Sales · Bid-by-Click Online Sales
www.TheLivestockLink.com

- Visit our website, www.thelivestocklink.com
- Click the "Auctions" tab
- Click on "Click Here to Register"
- Enter your e-mail address and password, and fill out all your contact information
- Fill out your Banking Information. If you are only viewing the sale and do not wish to bid, this information can be left blank.
- Check the checkbox at the bottom of the page that says "I'm not a robot" to prove you are a real person
- Click "Register" at the bottom of the page
- You will receive an email with a link to activate your account.
- **Please register to bid at least 24 hours in advance of the sale.**
- Contact Aaron Friedt at (701) 590-9597 for help or with any questions.

You will receive an email when you are approved for bidding. All applications will be reviewed and processed promptly. You will receive a bidder number only after you have made a purchase in the sale, and that number will only be used at that sale. When the sale is completed, please contact the sale owner or manager for instructions of payment and delivery of your purchase.
To use our service, you must have access to High Speed Internet.

Zoetis 50K Testing Reference Info

What are MVPs?

MVPs or Molecular Value Prediction are the predicted genomic breeding values for animals, based on the sum of the effects of the associated markers, expressed in units of measure for the trait. Similar to EPDs, MVPs rank animals for genetic merit and are expressed as deviations in performance from a set base-point for each trait. One-half of the difference in genomic breeding values between animals is transmitted to offspring.

What are Percentile Rankings (%)?

Percent ranks are based on the animal's MVP for each trait as compared to the overall population of Black and Red Angus animals in the Pfizer global database. Rank values indicate the 'top' position of the animal in the population, with lower values generally indicating higher and more favorable genetic merit for most traits. Traits of exception may include milking ability, yearling and mature height, mature cow weight and fat thickness, where lower percentage values generally indicate genetic merit for higher levels of milk and larger size, and higher associated feed requirements, and potentially less maternal adaptability

---

Calving Ease Direct

Describes differences in genetic merit for the likelihood of unassisted births in first-calf heifers, expressed as a trait of the progeny. Higher MVP values and lower ranks are preferred, especially when selecting sires for use on replacement heifers for easier calving progeny.

Birth Weight (BW)

Quantifies genetic differences in birth weight, with lower and moderate MVP values and ranks generally desired for ease of calving.

Weaning Weight (WW)

Measures difference in genetic merit for adjusted 205-day weaning weight, with higher MVP and lower rank values indicating heavier weights.

Yearling Weight (YW)

Indicates differences in breeding value for adjusted 365-day weight, with higher MVPs and lower ranks equating to genetics for heavier yearling weights.

Milking Ability (MILK)

Evaluates differences in genetic merit for the maternal component of calf weaning weight, predominantly due to milking ability of dams (or daughters). Genetic potential for milking ability should be matched to available feed resources, which implies that intermediate MVP and rank values are likely optimum for many production systems.

Scrotal Circumference (SC)

Describes genetic differences in age at puberty as indicated by adjusted yearling scrotal circumference. Larger MVPs and lower ranks for scrotal circumference equate to genetics for earlier and more desirable age at puberty in both bulls and heifers.

Marbling Score (MARB)

Quantifies genetic differences in USDA marbling scores at a constant age, with higher MVPs and lower ranks indicating higher levels of marbling and generally more desirable quality grades and associated carcass premiums.

Ribeye Area (REA)

Describes genetic variation in carcass muscularity as measured by ribeye area between the 12th and 13th rib, at a constant age. Larger MVPs and lower ranks for ribeye area favorably impact USDA yield grades and associated carcass premiums.

Molecular Value Prediction - Feedlot Index ($MVPFL)

Predicts net return from combined genetic merit for feedlot (FL) gain, dry matter intake, carcass weight, as well as USDA quality and yield grades (marbling, rideye area and fat thickness). The index assumes approximately 160 days on feed consuming concentrate rations and carcass value derived from a Certified Angus Beef (CAB) grid. Higher MVPs

Resource is a highly proven sire who consistently stamps his progeny with depth, muscle, and fleshing ability in the right package. The two and three-year old Resource daughters that we calved out were gentle, easy-keeping with very nice udders. These Resource sons will also improve foot quality. Use these Resource sons to produce sale topping steer calves and heifers that will control frame size and be the "keeping" kind.

The Tahoe cattle have impressed us, and we have used hard the last three years. We think that Tahoe will have a substantial positive impact on the Angus breeed. Use these powerful Tahoe sons to improve carcass quality while adding eye appeal and dimension. He is a proven, multi-purpose sire that is one of the most complete bulls in the Angus breed.

Jacob Don Herman

Tricia and Cody had baby Jacob on July 20, 2021. Born with calving ease at 7lb 0.8 oz and 20 inches and has posted high growth numbers ever since.

Happy 95th Birthday, Grandad!

Grandad turned 95 years old this summer on July 8. We are very thankful that he has been home this summer and fall.

MGR Treasure, a calving ease bull which offers substantial growth and outstanding marbling. His progeny are consistently square hipped and phenotypically attractive. Use Treasure as a valuable tool to moderate milk without sacrificing growth. The Treasure daughters looked very feminine when we ultrasounded them this fall.

Lori and I saw Emblazon 999 at Genex in Billings, MT. We were impressed with his extra length and power while offering a touch more frame and tremendous thickness, capacity, and fleshing ability. We are pleased to see the sons demonstrate a consistency in fleshing ability and thickness. The daughters are reportedly ideal with excellent udder quality. Emblazon 999 is a graduate of the ABS Sire Alliance and ranks in the top 3% for Feed Efficiency, and the top 10% for Total Profit and Maternal Indexes.
